

Business Training

EXCELLENCE IN ICT & MANAGEMENT TRAINING BELGIUM & LUXEMBOURG

WELCOME TO OUR TRAINING CENTERS

Dear Customer, Dear Partner,

As we are closing 2023, we would like to express our seasonal greetings and wish you a great start for 2024. In this new catalogue, we are proud to provide you with our best offers in IT, office end-users, and management trainings. Our practice leaders have selected, updated and designed over 300 courses in order to deliver the highest training quality. Our team is also available to build tailor-made trainings in order to fit your expectations. Based on requests from many of our customers, we have also added a selection of efficient "Soft skills" trainings you can discover at the end of this catalogue. Fulfilling your best training experience is our priority in 2024!

We look forward to seeing you soon!

The Business Training Team

REFERENCES & TESTIMONIALS

Our collaboration with Business Training began several years ago and we can only thank them for the quality training provided for our colleagues.

It is always a pleasure to collaborate with this trusted partner who is able to consider our needs and our environment.

We have been working with Business Training for some time for our EUC and IT training courses.

This collaboration is going well, we are a satisfied customer as the courses are positively experienced and assessed by our participants.

PARTNERSHIPS AND NEWS IN 2024

Business Training is excited to announce a new management, sales, and administrative team dedicated to pursuing the organization and delivery of high quality trainings.

Our courses this year will continue to focus on security and cloud topics in various technologies and methodologies, as well as introducing business management courses with Al. As mentioned in our introduction, we have partnered with Team Power to offer exclusive Soft Skills trainings.

We will pursue our partnerships with Microsoft as Gold partner, Red Hat, CISCO, Prince2® and ITIL® in order to deliver high added-value services on their products.

In addition, Business Training has become one of the biggest Pearson Vue Select Test Centers with 14 testing seats for high-end exams such as GMAT, SELT or all other certification exams. We also offer fully equipped modern training rooms in our spacious training centers which are ideally situated in Brussels and Luxembourg.

CONSULTING SERVICES

Business & ICT Consulting In synergy with **Business Training**, our consulting company **Business & ICT Consulting** operates all over Europe, offering our employees a favorable environment to develop their skills within our customer's environments.

These long term assignments allow for an efficient implementation and management of our customer's ICT departments, aligned with new arising models of organizations, built on both sustainable development and innovation.

SERVICE MANAGEMENT

ITIL® 4 Foundation [Most wanted] (Exam included)

ITIL® has led the IT Service Management industry with guidance, training and certification programs for over 30 years. ITIL® 4 brings ITIL® up to date by re-shaping much of the established ITSM practices in the wider context of customer experience, value streams, and digital transformation, as well as embracing new ways of working such as Lean, Agile, and DevOps.

ITIL® 4 provides the guidance organizations need to address new service management challenges and utilize the potential of modern technology. It is designed to ensure a flexible, coordinated and integrated system for the effective governance and management of IT-enabled services.

ITIL® 4 Practice Manager - Monitor, Support & Fulfil [New] (Exam included)

There are 34 management practices in ITIL® 4. They are defined as a set of organizational resources designed for performing work or accomplishing an objective, and they represent the most practical asset of the framework.

The practice courses are offered through both 'individual' and 'combined' approaches. The 'individual' approach is for candidates who want to acquire and develop their skills in a specific practice area; the 'combined' approach is for candidates aiming to establish a good cross-practice collaboration and effective service value streams.

The ITIL® 4 Monitor, Support and Fulfil combined practice module is for individuals aiming to gain understanding of the key concepts, principles, value and challenges of the following practices: Service Desk, Monitoring & Event Management, Incident Management, Service Request Management and Problem Management.

ServiceNow Administration Fundamentals [Most wanted] (Exam included)

During ServiceNow Fundamentals, participants learn about many topics and interact with various applications by navigating the platform and applying their newly acquired knowledge.

ServiceNow Fundamentals is a three-day course taught both as Instructor-Led Training (ILT) and Virtual Instructor-Led Training (VILT) in time zones throughout the world. Extensive hands-on exercises are included with each course module to reinforce the lecture concepts and provide practical experience. Exercises are performed in a personal dedicated training instance.

Several instructor-led group activities such as knowledge checks, concept reviews, and open discussions are embedded throughout the course flow. Participants are able to validate their newly acquired knowledge as well as benefit from real life business scenarios shared by fellow students.

Price: 2.400 € excl. VAT / participant

Practical Project Management With TSPM Certification [New]

The application of knowledge is a key success factor to learning. This course goes beyond the traditional project management class by first exposing the students to a rigorous study of the successful TenStep Project Management methodology. The students are then able to demonstrate their knowledge by managing a project from beginning to end with a software-based project simulation package. As a result, the students are more prepared to apply the methodology to real life situations.

Professional Scrum Foundations

The Professional Scrum Foundations (PSF) course is a 2-day course that teaches Scrum in a highly practical way. Working in a series of Sprints, teams of students build a software application, thereby facing real-life problems. The mechanics, roles, principles and (empirical) process of Scrum are demonstrated. Common missteps and misunderstandings are discussed so students grow a higher awareness of their symptoms.

01-02 February 06-07 June 05-06 September 05-06 December

Professional Scrum Master II (Exam included)

The PSM II is an advanced course that will raise your understanding of the stances that characterize an effective Scrum Master and Servant Leader. The class will teach you about complementary practices and the needed skills to enable you to have the right types of conversations and how to apply them to become an even better Scrum Master. Unlike the Professional Scrum Master (PSM) course which, mainly from a Scrum Master perspective, focuses on how to use Scrum, the Scrum framework and the role of the Scrum Master within it, the PSM II aims to clarify the desired mindset and behavior that is necessary to become an effective Scrum Master.

Professional Agile Leadership Essentials

The workshop provides a foundation for the role that leaders play in creating the conditions for a successful agile transformation. Leaders and managers are critical enablers in assisting their organizations becoming successful, yet the role of leaders and managers in an agile organization can be quite different from what they are used to. This workshop uses a combination of instruction and team-based exercises to help participants learn how to form and support agile teams to achieve better results, and how to lead the cultural and behavioral changes that organizations must make to reap the benefits of an agile product delivery approach.

Special PMP training and coaching [New]

Specialized PMP (Project Management Professional) training and coaching typically aim to prepare individuals for the Project Management Professional certification offered by the Project Management Institute (PMI).

This training program will be covering a comprehensive coverage of the PMBOK (Project Management Body of Knowledge) Guide, which serves as the foundation for the PMP exam. This includes an in-depth review of project management processes, knowledge areas, and best practices outlined in the PMBOK. The training phase of this course occurs through Interactive Learning Sessions delivered by experienced instructors or coaches will be involving lectures, discussions, and interactive exercises to reinforce concepts and aid in understanding complex project management topics. For the coaching phase, practice questions and mock exams will help participants assess their readiness and identify areas needing further study. In addition, the participants will be examining realworld case studies; by the analysis of real-world project management scenarios and case studies, participants will be able to apply theoretical knowledge to practical situations, for a better understanding on how to implement PMP principles in various contexts.

LEAN IT Startup [New]

The concept of "Lean Startup" is a methodology for business development focused on creating and managing startups and innovative projects.

This approach, popularized by Eric Ries, aims to reduce risks associated with launching new products or services by adopting an iterative and customer-centric methodology. The Lean Startup aims to minimize waste by avoiding the development of expensive and complex products that might not meet market needs. By adopting an agile approach, based on rapid testing and continuous adjustments, startups can be more responsive and increase their chances of success in the market.

SAFe°

To compete in a disruptive global market, every organization needs to deliver valuable technology solutions at the speed of business. This requires a shared DevOps mindset among all the people needed to define, build, test, deploy, and release software-driven systems — not just the engineers operating a CI/CD pipeline. The two-day, interactive SAFe® DevOps course helps people across technical, non-

technical, and leadership roles work together to optimize their value stream from end to end. Attendees will learn what DevOps is, why it is important to every role, and design a continuous delivery pipeline that is tailored to their business. Attendees work in cross-functional teams to map their current state value stream from concept to cash, identify major bottlenecks to flow, and build an actionable implementation plan that will accelerate the benefits of DevOps in their organization.

AZ-040 - Automating Adminstration with PowerShell

This course provides students with the fundamental knowledge and skills to use PowerShell for administering and automating administration of Windows servers. This course provides students the skills to identify and build the command they require to perform a specific task. In addition, students learn how to build scripts to accomplish advanced tasks such as automating repetitive tasks and generating reports.

Price: 2.250 € excl. VAT / participant

AZ-104 Microsoft Azure Administrator [Most wanted]

This course teaches IT Professionals how to manage their Azure subscriptions, create and scale virtual machines, implement storage solutions, configure virtual networking, backup and share data, connect Azure and on-premises sites, manage network traffic, implement Azure Active Directory, secure identities, and monitor your solution.

This course prepares for the Microsoft exam AZ-104

Price: 2.000 € excl. VAT / participant

AZ-140 Configuring and Operating Microsoft Azure Virtual Desktop

This course teaches Azure administrators how to plan, deliver, and manage virtual desktop experiences and remote apps, for any device, on Azure. Lessons include implementing and managing networking for Azure Virtual Desktop, configuring host pools and session hosts, creating session host images, implementing, and managing FSLogix, monitoring Azure Virtual Desktop performance and health, and automating Azure Virtual Desktop management tasks.

This course prepares for the Microsoft exam AZ-140

Price: 2.000 € excl. VAT / participant

AZ-204 - Developing Solutions for Microsoft Azure

In this course, students will gain the knowledge and skills needed to implement Azure laaS services and features in their development solutions. The course covers provisioning virtual machines, using Batch Service to deploy/maintain resources, and how to create containerized solutions by using Azure Kubernetes Service.

This course prepares for the Microsoft exam AZ-204

Price: 2.250 € excl. VAT / participant

AZ-220 - Microsoft Azure IoT Developer

This course provides students with the skills and knowledge required to successfully create and maintain the cloud and edge portions of an Azure IoT solution. The course includes full coverage of the core Azure IoT services such as IoT Hub, Device Provisioning Services, Asure Stream Analytics, Time Series Insights, and more. In addition to the focus on Azure PaaS services, the course includes sections on IoT Edge, device management, monitoring and troubleshooting, security concerns, and Azure IoT Central.

This course prepares for the Microsoft exam AZ-220

Price: 2.000 € excl. VAT / participant

DP-900 - Microsoft Azure Data Fundamentals

In this course, students will learn the fundamentals of database concepts in a cloud environment, get basic skilling in cloud data services, and build their foundational knowledge of cloud data services within Microsoft Azure. Students will identify and describe core data concepts such as relational, non-relational, big data, and analytics, and explore how this technology is implemented with Microsoft Azure. They will explore the roles, tasks, and responsibilities in the world of data. The students will explore relational data offerings, provisioning and deploying relational databases, and querying relational data through cloud data solutions with Microsoft Azure. They will explore non-relational data offerings, provisioning and deploying non-relational databases, and non-relational data stores with Microsoft Azure. Students will explore the processing options available for building data analytics solutions in Azure. They will explore Azure Synapse Analytics, Azure Databricks, and Azure HDInsight. Students will learn what Power BI is, including its building blocks and how they work together.

MD-100 Windows 10

This course bundles together the following training blocks: Installing Windows 10, Configuring Windows 10, Protecting Windows 10, Maintaining Windows 10.

This course prepares for the Microsoft exam MD-100

Price: 2.250 € excl. VAT / participant

Windows 11

N° 55342 - Supporting and Troubleshooting Windows 11 NEW

This is a 4-day ILT course that is designed to provide students with the knowledge and skills required to support and troubleshoot Windows 11 PCs and devices in an on-premises Windows Server Active Directory domain environment. These skills include understanding Important Windows 11 features, how these features are used in an Active Directory and how to troubleshoot these features. This course is the equivalent of the retired legacy MOC 10982E.

Price: 2.000 € excl. VAT / participant

Microsoft 365 BT-MDT10 - Deploying Windows 10/11 with Microsoft Deployment Toolkit (MDT)

This topic will walk you through the steps necessary to create the server structure required to deploy the Windows 10 operating system using the Microsoft Deployment Toolkit (MDT). It covers the installation of the necessary system prerequisites, the creation of shared folders and service accounts, and the configuration of security permissions in the files system and in Active Directory.

Price: 2.000 € excl. VAT / participant

Microsoft 365 MD-102 - Microsoft 365 Endpoint Administrator NEW

In this course, students will learn to plan and execute an endpoint deployment strategy using contemporary deployment techniques and implementing update strategies. The course introduces essential elements of modern management, co-management approaches, and Microsoft Intune integration. It covers app deployment, management of browser-based applications, and key security concepts such as authentication, identities, access, and compliance policies. Technologies like Microsoft Entra ID, Azure Information Protection, and Microsoft Defender for Endpoint are explored to protect devices and data. The Microsoft 365 Endpoint Administrator is responsible for deploying, configuring, securing, managing, and monitoring devices and client applications in a corporate setting. They should be well-versed in M365 workloads and possess extensive skills and experience in deploying, configuring, and maintaining Windows 11 and later, as well as non-Windows devices. Their role emphasizes cloud services over on-premises management technologies

Microsoft 365

MS-102 Microsoft 365 Administrator NEW [Most wanted]

This course covers the following key elements of Microsoft 365 administration: Microsoft 365 tenant management, Microsoft 365 identity synchronization, and Microsoft 365 security and compliance.

In Microsoft 365 tenant management, you learn how to configure all the options, component services, user accounts and licenses, security groups, and administrative roles. You then transition to configuring Microsoft 365, with a primary focus on configuring Office client connectivity. Finally, you explore how to manage user-driven client installations of Microsoft 365 Apps for enterprise deployments. The course then transitions to an in-depth examination of Microsoft 365 identity synchronization.

In Microsoft 365 security management, you begin examining the common types of threat vectors and data breaches facing organizations today, and how MS 365's security solutions address each of these threats. You are introduced to the MS Secure Score, as well as to Microsoft Entra ID Protection. You then learn how to manage the Microsoft 365 security services, including Exchange Online Protection, Safe Attachments, and Safe Links. Finally, you are introduced to the various reports that monitor an organization's security health. You then transition from security services to threat intelligence; specifically, using Microsoft 365 Defender, Microsoft Defender for Cloud Apps, and Microsoft Defender for Endpoint.

The Microsoft 365 compliance management begins with an overview of all key aspects of data governance, including data archiving and retention, Microsoft Purview message encryption, and data loss prevention (DLP). You then delve deeper into archiving and retention, paying particular attention to Microsoft Purview insider risk management, information barriers, and DLP policies. You then examine how to implement these compliance features by using data classification and sensitivity labels.

This course prepares for the Microsoft exam MS-102

Price: 2.250 € excl. VAT / participant

Microsoft 365

N° 55354 - Administering Office 365

This five-day course describes how to set up, configure and manage an Office 365 tenant including identities, and the core services of Microsoft 365. In this five-day course, you will learn how to plan the configuration of an Office 365 tenant including integration with existing user identities; plan, configure and manage core services; and report on key metrics. Although this course and the associated labs are written for Office 365 with Windows 11, the skills taught will also be backwards compatible with Windows 10. This course is based on the features available in the Office 365 E3 license as these are the core features in Office 365 and Microsoft 365 plans. This course is the Community Courseware equivalent of retired MOC MS-030

MS-721 - Collaboration Communications Systems Engineer [New]

This training course is designed to give participants the knowledge and skills to become a Collaboration Communications Systems Engineer. Participants should understand the fundamentals of networking, telecommunications, audio/visual and meeting room technologies, identity and access management, and Microsoft Teams.

They will gain hands-on experience configuring and deploying Microsoft Teams Phone, meetings and certified devices including Microsoft Teams Rooms and Surface Hub. The course will also cover how to manage and monitor Teams Phone, meetings, and certified devices using the Microsoft Teams admin center, PowerShell, the Microsoft Teams Rooms Pro Portal, and the Call Quality Dashboard.

In addition, the course will cover configuring and deploying Microsoft Teams Phone with PSTN connectivity through Microsoft Calling Plans, Operator Connect, Teams Phone Mobile, and Direct Routing.

This course prepares for the Microsoft exam MS-721

SESSIONS

MS-900 - Microsoft 365 Fundamentals

This course provides foundational knowledge on the considerations and benefits of adopting cloud services and the Software as a Service (SaaS) cloud model, with a specific focus on Microsoft 365 cloud service offerings. You will begin by learning about cloud fundamentals, including an overview of cloud computing and specifically Microsoft cloud services. You will be introduced to Microsoft Azure, and you will examine the differences between Microsoft 365 and Office 365. You will then perform an in-depth review of Microsoft 365, including a comparison of Microsoft on-premises services versus Microsoft 365 cloud services, a review of enterprise mobility in Microsoft 365, and an analysis of how Microsoft 365 services provide collaboration. The course then analyzes how security, compliance, privacy, and trust are handled in Microsoft 365, and it concludes with a review of Microsoft 365 subscriptions, licenses, billing, and support.

This course prepares for the Microsoft exam MS-900

Microsoft Power Platform

PL-200 - Microsoft Power Platform Functional Consultant

The Power Platform empowers organizations to automate business processes, develop their own rich app experiences, and connect with customers better and faster. In this course, students will learn to perform discovery, capture requirements, engage subject matter experts and stakeholders, translate requirements, and configure Power Platform solutions and apps. They will supplement their learnings with hands-on labs to create application enhancements, custom user experiences, system integrations, data conversions, custom process automation, and custom visualizations. Power Platform is comprised of four key products: Power Apps, Power Automate, Power BI, and Power Virtual Agents. In this course, we will cover these four applications in depth, with additional focus on the Common Data Service, AI Builder, connectors, and portals. This course prepares for the Microsoft exam PL-200

Architecting on AWS

Architecting on AWS covers the fundamentals of building IT infrastructure on AWS. The course is designed to teach solutions architects how to optimize the use of the AWS Cloud by understanding AWS services and how these services fit into Cloud-based solutions. Because architectural solutions may differ depending on industry, type of applications, and size of business, this course emphasizes AWS Cloud best practices and recommended design patterns to help students think through the process of architecting optimal IT solutions on AWS.

Advanced Architecting on AWS

Building on concepts introduced in Architecting on AWS, Advanced Architecting on AWS is intended for individuals who are experienced with designing scalable and elastic applications on the AWS platform. Building on concepts introduced in Architecting on AWS, this course covers how to build complex solutions which incorporate data services, governance, and security on AWS. This course introduces specialized AWS services, including AWS Direct Connect and AWS Storage Gateway to support Hybrid architecture. It also covers designing best practices for building scalable, elastic, secure, and highly available applications on

AMAZON WEB SERVICES

Advanced Developing on AWS

The Advanced Developing on AWS course uses the real-world scenario of taking a legacy, on-premises monolithic application and refactoring it into a serverless microservices architecture. This three-day advanced course covers advanced development topics such as architecting for a cloud-native environment; deconstructing on-premises, legacy applications and repackaging them into cloud-based, cloud-native architectures; and applying the tenets of the Twelve-Factor Application methodology.

Price: 2.195 € excl. VAT / participant

N° 55320 - Programming with HTML, CSS, and JavaScript

This five-day instructor-led is intended for IT professionals interested in becoming clientside web developers who need to get a jump start on all three technologies. The course includes more than 30 exercises, providing a rapid hands-on introduction to the three major client-side languages: HTML, CSS, and JavaScript. Students should be prepared to cover a lot of ground quickly. Like that course, this course focuses on using HTML, CSS, and JavaScript to develop web pages, implement programming logic, define and use variables, perform looping and branching, capture and validate user input, store data, and create well-structured applications. This course does not cover the HTML5 APIs covered in 20480. This course is the equivalent of the retired legacy MOC 20480C.

Price: 2.250 € excl. VAT / participant

ISTQB Foundation v4.0 (CTFL)

The goal of this 3-day course is to provide a full understanding of the fundamental principles of requirements engineering and to enhance the knowledge and practical experience in the domains of requirements engineering and requirements management. This three-day training course is a preparation for the exam "Foundation Certificate in Software Testing" and is accredited by ISTQB and ISEB.

This course prepares for the "Certified Tester - Foundation Level" exam - 275€ excl VAT / delegate

Price: $1.725 \in \text{excl. VAT} / \text{participant}$

ISTQB Advanced Test Analyst (CTAL-TA)

This 3-day course provides test engineers with advanced skills in test analysis, design, and execution through direct instruction and group exercises, that goes beyond the ISTQB Foundation level. This ISTQB accredited hands-on course enables test engineers to define and carry out the tasks required to put the strategy into action and is ideal for testers and test teams preparing for certification. In preparation for the exam, participants will learn the subject matter behind the test standard and deepen their understanding by working through case studies and exercises.

This course prepares for the "Certified Tester Advanced Level -Test Analyst" exam - 295€ excl VAT / delegate

ISTQB Advanced Test Manager (CTAL-TM)

This 5-day course provides an understanding of software test management that goes beyond the ISTQB Foundation level. Test managers acquire a good level of knowledge enabling analysis of situations in order to present practical solutions. The information gained during this course offers a framework for test managers to build upon within their organisations. Spreadsheets, templates and utilities will be provided enabling managers to be more efficient and effective within their organisations. Following the ISTQB Foundation Certificate, the Advanced Test Manager Certificate provides the next level of knowledge and practical expertise in the ISTQB Advanced Certification scheme. This course prepares for the "Certified Tester Advanced Level - Test Manager" exam - 295€ excl VAT / delegate

Test Automation with Selenium

2-day course. Open source test automation tools are more and more used for testing web application. Selenium is the market leader as open source web application test automation tool. It is a robust set of tools that supports rapid development of test automation for web-based applications. This tool is primarily developed in Java Script and browser technologies and hence supports all the major browsers on all the platforms.

CITRIX

CWS-215 - Citrix Virtual Apps and Desktops 7 Administration On-**Premises and in Citrix Cloud - Live Virtual Classes**

This foundational administration course covers the aspects of installing, configuring and managing a Citrix Virtual Apps and Desktops 7 environment, how to manage an on-premises Citrix solution and migrate from an on-premises solution to cloud using the Citrix Cloud management plane. This five-day course will teach you how to deploy, install, configure, setup profile management, configure policies, printing and basic security features for on-premises Virtual Apps and Desktop solution building, and then migrating to Citrix Cloud. Exam voucher included

Price: 3.295 € excl. VAT / participant

11/11/11 CISCO

Implementing Cisco Enterprise Advanced Routing and Services (ENARSI)

This course gives you the knowledge you need to install, configure, operate, and troubleshoot an enterprise network. This course covers advanced routing and infrastructure technologies, expanding on the topics covered in the Implementing and Operating Cisco Enterprise Network Core Technologies (ENCOR) v1.0 course. This course helps prepare you to take the exam, Implementing Cisco Enterprise Advanced Routing and Services (300-410 ENARSI).

Price: 3.495 € excl. VAT / participant

ONTAP 9.10 Cluster Administration (ONTAP9ADM)

English virtual class 29-30-31 January

■ NetApp

This newly updated to ONTAP v9.3 is a three-day, instructor-led course uses lecture and hands-on exercises to teach basic administration of an ONTAP® cluster. You configure and maintain a cluster. You practice working with ONTAP features. You use the cluster shell and OnCommand® System Manager to manage storage and network resources. ONTAP Cluster Administration is an intermediate course in a comprehensive learning path for customers, partners, and NetApp employees.

22-23-24 April 20-21-22 May 01-02-03 July

Price: 2.850 € excl. VAT / participant

■ NetApp

ONTAP 9.10 Data Protection Administration (DATAPROT9)

This newly updated Data Protection course using ONTAP 9.3 software, will teach you to become proficient with ONTAP SnapMirror, SnapVault, SVM DR, SyncMirror, and NDMP technologies used to replicate, restore, and protect mission-critical data in the enterprise. Backup and restore operations are taught using the NetApp storage system CLI and the OnCommand System Manager. The course also provides an overview of the ONTAP MetroCluster high-availability and disaster recovery software solution.

FORTINET

SESSIONS

FortiGate Security - NSE 4

In this 3-day class, you will learn how to use basic FortiGate features, including security profiles. In interactive labs, you will explore firewall policies, user authentication, SSL VPN, Dial-up IPsec VPN, and how to protect your network using security profiles such as IPS, antivirus, web filtering, application control, and more. These administrative fundamentals will provide you with a solid understanding of how to integrate basic network security.

Price: 1.995 € excl. VAT / participant

FortiMail - NSE 6 (221)

In this 3-day class, you will learn how to use FortiMail. In interactive labs, you will explore FortiMail's role as a specialized device, and how its features extend beyond FortiGate email filtering to provide both high-performance and in depth security for business-critical communications. You will analyze MMS and email security challenges that administrators from small businesses to carriers face. These administrative fundamentals will provide you with a solid understanding of where and how to deploy and troubleshoot FortiMail, including FortiSandbox integration.

RH124 [Most wanted] Red Hat System Administration I

This training is designed for IT professionals who are new to Linux and require core Red Hat Enterprise Linux skills. Focused on administration tasks that will be encountered in the workplace.

Price: 3.075 € excl. VAT / participant

Red Hat

RH135 Red Hat System Administration II

This training is designed for IT professionals working to become full-time enterprise Linux system administrators. The course is a follow up to System Administration I and continues to utilize today's best-of-breed, contemporary teaching methodology. RHCSA Exam included

Price: 4.304 € excl. VAT / participant

RH200 - [Most wanted] RHCSA Rapid Track Course

This training is designed for experienced Linux System Administrators who want to harden their technical skill sets and become accredited with the RHCSA certification. RHCSA Exam included

Price: 4.517 € excl. VAT / participant

RH295 - Red Hat System Administration III: Linux Automation with Ansible

Red Hat Enterprise Linux Automation with Ansible and exam (RH295) is designed for Linux® system administrators and developers who need to learn and validate how to automate provisioning, configuration, application deployment, and orchestration. You will prove your ability to install and configure Ansible® on a management workstation; prepare managed hosts for automation; write Ansible Playbooks to automate tasks; and run playbooks to ensure servers are correctly deployed and configured. Exam included

Price: 3.924 € excl. VAT / participant

RH362 - Red Hat Security: Identity Management and Authentication [New]

Provide help to secure, centralized identity management services to coordinate user authentication and authorization with client systems, network services, and Windows domains. Red Hat Security: Identity Management and Authentication (RH362) provides the skills to configure and manage Identity Management (IdM), the comprehensive identity management component bundled with Red Hat Enterprise Linux. Some topics covered in this course are central management and provisioning of user accounts; design and installation of IdM server topologies; operation of the integrated DNS and TLS Certificate Authority services; management of two-factor authentication, smart card authentication, and operation as a single-sign on provider; integration and management of two-way trusts with Active Directory; and troubleshooting and disaster recovery planning. Registration of Linux clients to IdM and operation in enterprise environments that use both Linux and Microsoft Windows clients and servers is discussed. This course helps students to gain the skills with this technology most requested by customers.

RH436 - Red Hat High Availability Clustering [New]

This course provides intensive, hands-on experience in deploying and managing shared storage and server clusters. In this course, you will learn how to provide highly available network services to a mission-critical enterprise environment through the deployment and management of shared storage and server clusters. Created for senior Linux system administrators, this course strongly emphasizes lab-based activities. You will set up a cluster of systems running the Pacemaker component of the Red Hat Enterprise Linux High-Availability Add-On, and deploy Linux-based services such as web servers and databases on that cluster. Cluster storage components from the Resilient Storage Add-On are also covered; installations and applications that require multiple cluster nodes can access the same storage simultaneously. This includes Logical Volume Manager (LVM) Shared Volume Groups, Red Hat Global File System 2 (GFS2), and Device-Mapper Multipath. This course is based on Red Hat Enterprise Linux 8.3

DO180 - Red Hat OpenShift Administration I: Managing containers & **Kubernetes** [Most wanted]

This course prepares OpenShift cluster administrators to manage Kubernetes workloads and to collaborate with developers, DevOps engineers, system administrators, and SREs to ensure the availability of application workloads. This course focuses on managing typical end-user applications that are often accessible from a web or mobile UI and that represent most cloud-native and containerized workloads. Managing applications also includes deploying and updating their dependencies, such as databases, messaging, and authentication systems. The skills that you learn in this course apply to all versions of OpenShift, including Red Hat OpenShift on AWS (ROSA), Azure Red Hat OpenShift, and OpenShift Container Platform.

This cours is based on Red Hat Openshift 4.12

Price: 3.600 € excl. VAT / participant

DO316 - Managing Virtual Machines with Red Hat OpenShift Virtualization [New]

Create and manage virtual machines on OpenShift using the Red Hat OpenShift Virtualization operator. This course teaches the essential skills required to create and manage virtual machines (VM) on OpenShift using the Red Hat OpenShift Virtualization operator. This course does not require previous knowledge of containers and Kubernetes. This course provides: Skills required to create, access, and manage VMs on OpenShift clusters; Skills required to control usage and access of cpu, memory, storage, and networking resources from VMs using the same Kubernetes features that would also control usage and access to these resources for containers; Sample architectures to manage High Availability (HA) of VMs using standard Kubernetes features and extensions from OpenShift Virtualization; Strategies to connect VMs on OpenShift to data center services outside of their OpenShift cluster, such as storage and databases.

DO329 - Building Resilient Microservices with Istio and Red Hat **Service Mesh**

Openshift created an enterprise-ready, multi-tenant platform that made deploying and scaling microservice applications efficient and easily repeatable. But as these architectures become larger and more complex, defining how these services interact with each other becomes increasingly difficult. Red Hat OpenShift Service Mesh comprises 3 products—Istio, Jaeger, and Kiali—that facilitate service interaction management, provide service tracing, and create a visual representation of communication pathways. Exam included

DO371 Enterprise Kubernetes Storage with Red Hat OpenShift Data **Foundation**

Traditional storage options available to Kubernetes administrators are limited and lack flexibility and/or versatility. Red Hat OpenShift Data Foundation provides real advantages, even when it is backed by cloud storage such as AWS EBS and sophisticated on-prem legacy storage like SAN arrays. Many companies rely on third-party solutions to manage backup and disaster recovery in production. However, proper planning to implement these solutions requires knowledge of the Kubernetes CSI and OAPD APIs.

DO374 - Developing Advanced Automation with Red Hat Ansible **Automation Platform [New]**

Advance your Ansible skills and develop automation that scales by applying recommended practices with the new, container focused tools from Red Hat Ansible Automation Platform. This course is designed for automation content developers to leverage the new, container focused tools from Red Hat® Ansible Automation Platform to efficiently develop automation that can be managed by the automation controller. Learn recommended practices for automation development using reusable code, advanced playbook techniques, shared execution environments, and preparing for scalable automation with the automation content navigator.

This course is based on Red Hat Ansible Automation Platform 2.2.

Price: 3.600 € excl. VAT / participant

DO457 - Ansible for Network Automation

Red Hat Ansible for Network Automation is designed for network administrators or infrastructure automation engineers who want to use network automation to centrally manage the switches, routers, and other devices in the organization's network infrastructure.

Price: 3.600 € excl. VAT / participant

DO467 - Managing Enterprise Automation with Red Hat Ansible **Automation Platform [New]**

Manage complex Red Hat Ansible automation workflows at scale and prevent single points of failure. This course is for experienced Ansible automation engineers, DevOps practitioners, and Linux system administrators seeking to deploy, control, and support centralized automation execution on a large scale. Students will use Red Hat Ansible Automation Platform 2 to scale up Ansible automation. They will deploy automation controller to centrally manage automation workflows, automation mesh to scale up and distribute execution capacity, and private automation hub to manage Ansible Content Collections and automation execution environments for use by automation developers. Large scale automation cluster design and approaches to ensure high availability of Ansible Automation Platform will also be discussed.

This course is based on Red Hat Ansible Automation Platform 2.2.

Price: 3.600 € excl. VAT / participant

Red Hat

DO480 - Multicluster Management with Red Hat OpenShift Platform Plus [New]

Enhance container management capabilities with automation, governance, and security across clusters. This course teaches the skills required to maintain a diverse portfolio of applications, running across a fleet of OpenShift clusters. Applications follow placement rules determined by capacity and criticality; cluster configurations comply with governance and security policies; all automated according to DevOps principles. This course is based on Red Hat OpenShift Container Platform 4.10 and Red Hat Advanced Cluster Management 2.4.

Price: 3.600 € excl. VAT / participant

Access 365 - Level 2

Many organisations have large databases in Access that have built up over the years; staff have learned enough to build a database with a good relational structure, create forms to enter data and write queries to generate some useful reports. However, when databases get big making your queries and forms effective can become more complex and it is worth investing in advanced Access training to get the most from your data and save time. And our Advanced Microsoft Access course teaches delegates how to analyse data by creating complex queries, make forms and reports more efficient, speed repetitive tasks by creating macros.

PowerPoint 365 - Level 2

Learn how to best create, edit and share presentations with PowerPoint. We will show you how to build a slide show from scratch or use PowerPoint templates and themes for a quick set-up. We'll then demonstrate how to add and edit text, images, graphics, video, and animations; how to format slides for consistency; and how to add speaker notes and transitions for smooth delivery. Also discover how to collaborate on changes and share the final presentation via print, PDF or a recorded slide show.

SOFT SKILLS

Digital transition, driving change

This course will enable you to better support the transformation of an organisation towards the digital enterprise. You will discover the new digital tools that accelerate change and move the lines between IT, HR and Business. It will also show you how controlling the human impact of these changes is essential to the success of your projects.

Price: 950 € excl. VAT / participant

Manager: supporting your team in a crisis situation

The aim of this training is to enable you to acquire the tools and the appropriate behaviour to manage each phase of a crisis and uncertainty situation effectively and humanely. You will also learn how to prevent and anticipate crisis situations by assessing threats and risks.

Price: 950 € excl. VAT / participant

Change management

Be able to carry out full problem analyses dealing with change, and provide accompaniment to your co-workers.

Objectives:

- Identify your own inhibitions towards change and develop the strategies to cope with them;
- Discover your personal keys to success, your own strengths and talents;
- Define the different actors in the change process and take control over them.

Price: 550 € excl. VAT / participant

Time and priority management

Learn how to efficiently manage your time and your priorities.

Objectives:

- Become aware of your own responsibility in terms of time management to improve your personal efficiency;
- Focus on the high-yield activities and (re)define priorities;
- Acquire time management techniques, for yourself and for your co-workers

Price: 550 € excl. VAT / participant

Team cohesion

Team cohesion is the quality of the bond that brings people together, that unites. This is what allows you to surpass yourself for the benefit of the community. Each employee then feels competent, important and in their place within the team.

Objectives:

- Learn to work better together and to create real synergy in order to easily achieve common objectives;
- strengthen team cohesion and create a positive team spirit

Price: 550 € excl. VAT / participant

Digital detox for managers

Reduce dependence on technology, both for you and your teams, by creating healthy digital habits, to reduce screen time and improve focus & work-life balance. Objectives:

- Awareness and personal assessment.
- Self-assessment of digital habits.
- Understand how technology impacts productivity and well-being.

Conflict management and how to stop it on time

Conflict is common but not necessarily harmful: it can be prevented, managed or transformed into tracks for improvement. Understand that conflicts can also have positive effects, and learn to master techniques to anticipate conflicts, to manage the interpersonal issues, to solve conflicts in a team.

Objectives:

- Definition, types of conflicts, the causes and the evolution of conflicts.
- Acquire methods to manage and solve conflicts in a constructive way.
- Evaluate the impact of one's attitude on the handling of the conflict.
- No solution? Separate conflict and environment.

Most of our trainings are available in several languages, don't hesitate to contact us, we will organize extra sessions as from 4 students.

SOFT SKILLS

Feedback, a management tool

"How can I give continuous feedback in an open and constructive manner? How can I prepare myself for a feedback conversation? Which tools can I use? To give and take feedback is essential for efficient communication and good functioning within an organization. This is why feedback shouldn't only be limited to key moments such as counselling and performance reviews or whilst encountering problems or dealing with crisis situations.

Objectves:

- Master the two techniques: positive feedback, constructive criticism feedback.
- Recognize the communication needs of your team.
- Master a method for giving feedback without demotivating.

Price: 550 € excl. VAT / participant

Intergenerational management

By putting on so-called "generation glasses", we are able to better understand all generations and give them an optimal place in the organization. Intergenerational management provides the answer to the question "How can we improve our existing management by making it "generationproof"?

Objectives:

- Understanding the different generations and their phases of life;
- The strengths and pitfalls of each generation;
- The backgrounds of the different generations and the impact this has on their attitude, way of working, motivation and employability

Price: 550 € excl. VAT / participant

Situational leadership

To be a vector of efficiency and success, management must constantly adapt. This is called situational leadership. There is no good or bad style. It's all about the circumstances, situations and personalities involved.

Objectives:

- Adopt effective leadership according to the situation.
- Explain the different leadership styles.
- Be able to complete and use the maturity matrix of your team.

SOFT SKILLS SESSIONS

Motivate your collaborators

Motivation is not something acquired once and for all, it needs to be maintained. Look at your own example. You are probably not motivated in the same way every day, you go through phases, even slight ones, of doubt, even discouragement.

Objectives:

- Control the impact of your own (de)motivation on that of your collaborators.
- Identify the sources of your colleagues' motivation (avoid projections).
