WELCOME TO OUR TRAINING CENTERS

Dear Customer, Dear Partner,

2024 saw the latest evolution in IT take shape, with Artificial Intelligence (A.I.) becoming more business-critical than ever, and being used at a strategic level across diverse business sectors. To prepare for 2025, we have been developing a portfolio of A.I. trainings to allow our clients to stay on the cutting edge of this revolution. These newly developed trainings, demonstrate that Business Training continues to invest in the future for our clients, so that they can keep abreast of the rapidly developing world of IT solutions and services. We will continue to build tailor-made trainings in order to fit your expectations. As always, our dedicated team of Practice Leaders have performed a thorough review of our offerings, to ensure that they match your needs for 2025!

We look forward to seeing you soon!

The Business Training Team

HERE ARE SOME OF OUR CLIENTS

NEWS FOR 2025

Business Training is ready for the coming 12 months, having prepared multiple new trainings for our clients. Look out for the new Artificial Intelligence, CRM, Microsoft, CISCO and Red Hat trainings, amongst others.

As we are living in a rapidly changing IT world, we will keep developing training solutions throughout the course of the year, so please don't hesitate to contact us directly for any specific enquiries or requirements, as we can create bespoke trainings for specific client needs.

Of course, our partnerships with **Microsoft** as **Gold partner**, **Red Hat**, **CISCO**, **PRINCE2®** and **ITIL®** remain as part of our core offering for 2025.

Business Training is currently one of the largest **Pearson Vue Select Test Centers** with 14 testing seats for high-end exams such as GMAT, SELT or all other certification exams.

We also offer fully equipped modern training rooms in our spacious training centers which are ideally situated in Brussels and Luxembourg.

CONSULTING SERVICES

Business & ICT Consulting

In synergy with **Business Training**, our consulting company **Business & ICT Consulting** operates all over Europe, offering our employees a favorable environment to develop their skills within our customer's environments.

These long term assignments allow for an efficient implementation and management of our customer's ICT departments, aligned with new arising models of organizations, built on both sustainable development and innovation.

SERVICE MANAGEMENT		SESSIONS	
	ITIL® 4 Foundation [Most wanted] <i>(Exam included)</i>	Dutch in Brussels 19-20-21 November 15-16-17 December	French in Bru. & Lux. 03-04-05 November 08-09-10 December
	ITIL® has led the IT Service Management industry with guidance, training and certification programs for over 30 years. ITIL® 4 brings ITIL® up to date by re-shaping much of the established ITSM practices in the wider context of customer experience, value streams, and digital transformation, as well as embracing new ways of working such as Lean, Agile, and DevOps.	English in Bru. & Lux. 03-04-05 December	
	ITIL® 4 provides the guidance organizations need to address new service management challenges and utilize the potential of modern technology. It is designed to ensure a flexible, coordinated and integrated system for the effective governance and management of IT-enabled services. <i>An exam voucher that is valid for one year will be issued on the first day of the training.</i>		Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60
The ITIL 4 Foundation course is provided by Business Training, an ATO of PeopleCert.			

Prices: Classroom 1.450 € excl. VAT / participant
E-Learning including exam 850 € excl. VAT / licence

SERVICE MANAGEMENT		SESSIONS	
	ITIL® 4 Specialist - Create, Deliver and Support <i>(Exam included)</i>	English in Bru. & Lux. Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60	
	This module covers the ‘core’ service management activities and expands the current scope of ITIL® to cover the ‘creation’ of services. It focuses on the integration of different value streams and activities to create, deliver and support IT-enabled products and services whilst also covering supporting practices, methods and tools. It covers service performance aspects and provides practitioners with an understanding of service quality and improvement methods. It enables IT practitioners to continue to deliver innovative yet reliable technology-enabled services to their customers in an increasingly competitive market. <i>An exam voucher that is valid for one year will be issued on the first day of the training</i> ITIL 4 Specialist: Create, Deliver and Support course is provided by Business Training, an ATO of PeopleCert Price: 1.950 € excl. VAT / participant		
		ITIL® 4 Specialist - Drive Stakeholder Value <i>(Exam included)</i>	English in Bru. & Lux. Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60
		This module covers all types of engagement and interactions between a service provider and their customers, users, suppliers and partners. It focuses on the conversion of demand into value via IT enabled services. It addresses topics such as Service Level Agreement (SLA) design, multi-supplier management, communication, relationship management, customer experience (CX) and user experience (UX) design, and customer journey mapping. It provides candidates with the tools to increase stakeholder satisfaction which is integral to business success in the current competitive landscape. <i>An exam voucher that is valid for one year will be issued on the first day of the training.</i> ITIL 4 Specialist - Drive Stakeholder Value course is provided by Business Training, an ATO of PeopleCert Price: 1.950 € excl. VAT / participant	
		ITIL® 4 Specialist - High Velocity IT <i>(Exam included)</i>	English in Bru. & Lux. Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60
		This module explores the ways in which digital organizations and digital operating models function in high velocity environments. It helps aspiring organizations to operate in a similar way to successful digitally-native organizations. It includes the use of working practices such as Agile and Lean, and technical practices and technologies such as Cloud, Automation, and Automatic Testing, focusing on rapid delivery of products and services to obtain maximum value. <i>An exam voucher that is valid for one year will be issued on the first day of the training.</i> The ITIL® 4 Specialist and ITIL® 4 Strategist courses are offered in collaboration with D-ICT Solutions ATO/Affiliate. Price: 1.950 € excl. VAT / participant	

Most of our trainings are available in several languages, don’t hesitate to contact us, we will organize extra sessions as from 4 students.

SERVICE MANAGEMENT		SESSIONS
	ITIL® 4 Strategist - Direct, Plan & Improve <i>(Exam included)</i> This is a universal module that will be a key component of both ITIL® 4 Managing Professional and ITIL® 4 Strategic Leader streams. It provides candidates with the practical skills necessary to create a learning and improving IT organization, with a strong and effective strategic direction. It covers the influence and impact of Agile and Lean ways of working, and how they can be leveraged to an organization's advantage. It provides practitioners with a practical and strategic method for planning and delivering continual improvement with necessary agility. <i>An exam voucher that is valid for one year will be issued on the first day of the training.</i> The ITIL® 4 Specialist and ITIL® 4 Strategist courses are offered in collaboration with D-ICT Solutions ATO/Affiliate. Price: 1.950 € excl. VAT / participant	English in Bru. & Lux. Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60
	ITIL® 4 Strategic Leader - Digital and IT Strategy <i>(Exam included)</i> The pace of evolution in the digital world has never been so fast and organizations need to be flexible and adapt to the ever-changing environment if they want to keep providing value to their customers while remaining competitive in the marketplace. This module focuses on the alignment of digital business strategy with IT strategy. It covers how disruption from new technologies are impacting organizations in every industry and how business leaders are responding. It adds a new perspective to the ITIL® suite and elevates the discussion around ITIL® concepts to a strategic level among business leaders and aspiring leaders. It helps IT leaders and aspiring leaders build and implement effective IT and digital strategy that can tackle digital disruption and drive success. <i>An exam voucher that is valid for one year will be issued on the first day of the training.</i> The ITIL® 4 Specialist and ITIL® 4 Strategist courses are offered in collaboration with D-ICT Solutions ATO/Affiliate. 	Professional Scrum Foundations The Professional Scrum Foundations (PSF) course is a 2-day course that teaches Scrum in a highly practical way. Working in a series of Sprints, teams of students build a software application, thereby facing real-life problems. The mechanics, roles, principles and (empirical) process of Scrum are demonstrated. Common missteps and misunderstandings are discussed so students grow a higher awareness of their symptoms. Price: 1.495 € excl. VAT / participant	English in Bru. & Lux. 27-28 February 26-27 May 27-28 October 08-09 December Also available in FR or NL, contact us for more information
	Professional Scrum Master I <i>(Exam included)</i> The Professional Scrum Master I (PSM) course is a 2-day course that covers the principles and (empirical) process theory underpinning the mechanics, rules and roles of the Scrum framework. Advanced tools for servant-leadership are provided to increase a Scrum Master's effectiveness. These tools relate to behavioral shifts, working with people and teams, coaching and facilitation techniques, and addressing the organization. Price: 1.495 € excl. VAT / participant E-Learning including exam 890 € excl. VAT / licence	English in Bru. & Lux. 06-07 March 16-17 June 02-03 October 01-02 December

PORTFOLIO, PROGRAM & PROJECT MANAGEMENT SESSIONS

	Professional Scrum Master II <i>(Exam included)</i> The PSM II is an advanced course that will raise your understanding of the stances that characterize an effective Scrum Master and Servant Leader. The class will teach you about complementary practices and the needed skills to enable you to have the right types of conversations and how to apply them to become an even better Scrum Master. Unlike the Professional Scrum Master (PSM) course which, mainly from a Scrum Master perspective, focuses on how to use Scrum, the Scrum framework and the role of the Scrum Master within it, the PSM II aims to clarify the desired mindset and behavior that is necessary to become an effective Scrum Master. Price: 1.495 € excl. VAT / participant	English in Bru. & Lux. 13-14 February 12-13 May 15-16 September 06-07 November
	Professional Scrum Product Owner <i>(Exam included)</i> The Professional Scrum Product Owner (PSPO) course is a 2-day course on how to maximize the value of software products and systems.Product Ownership in Scrum today requires more than knowledge of how to write requirements or manage a Product Backlog. Professional Scrum Product Owners need to have a concrete understanding of everything that drives value from their products. Price: 1.495 € excl. VAT / participant E-Learning including exam 890 € excl. VAT / licence	English in Bru. & Lux. 30-31 January 17-18 April 04-05 September 03-04 November
	Professional Scrum Product Owner Advanced <i>(Exam included)</i> This 2-day Professional Product Owner - Advanced (PSPO-A) course focuses on helping experienced practitioners expand their ability to establish a solid vision, validate their hypotheses, and ultimately deliver more value to their stakeholders. The PSPO-A course is intended for Product Owners who are looking to grow their knowledge and abilities. The course goes beyond the topics explored in the Professional Scrum Product Owner (PSPO) class by deepening the attendee's understanding of the role through the exploration of the many stances of a professional Product Owner. Price: 1.495 € excl. VAT / participant	English in Bru. & Lux. 03-04 February 05-06 May 29-30 September 13-14 November
	Professional Scrum Developer <i>(Exam included)</i> Professional Scrum Developer™ (PSD) is a 3-day course where students make up an entire Scrum Team where they concurrently do requirements engineering, design, development, testing, integration and deployment within a single iteration. Price: 1.950 € excl. VAT / participant	English in Bru. & Lux. 27-28-29 January 28-29-30 April 17-18-19 September 24-25-26 November
	Professional Scrum with UX <i>(Exam included)</i> Professional Scrum with UX bridges the gap between Scrum, User eXperience and Design practices. The Professional Scrum with UX class focusses on learning how to integrate modern UX practices into the way you and your team are working in Scrum and how to work most effectively within Scrum teams. Scrum.org selects only the most qualified instructors to deliver this course. Scrum.org maintains the defined curriculum and materials to assure consistency and quality for students worldwide. Price: 1.495 € excl. VAT / participant	English in Bru. & Lux. 13-14 March 12-13 June 13-14 October 11-12 December
	Professional Agile Leadership Essentials The workshop provides a foundation for the role that leaders play in creating the conditions for a successful agile transformation. Leaders and managers are critical enablers in assisting their organizations becoming successful, yet the role of leaders and managers in an agile organization can be quite different from what they are used to. This workshop uses a combination of instruction and team-based exercises to help participants learn how to form and support agile teams to achieve better results, and how to lead the cultural and behavioral changes that organizations must make to reap the benefits of an agile product delivery approach. Price: 1.495 € excl. VAT / participant	English in Bru. & Lux. 03-04 March 02-03 June 06-07 October 04-05 December

Most of our trainings are available in several languages, don't hesitate to contact us, we will organize extra sessions as from 4 students.

DevOps Essentials

The DevOps movement believes there is a better way of building teams and software that has rapidly spread across the development and operations community. The culture of a DevOps organization and team is the heart of the movement and the most important pillar to implement. In this two day course you will explore the origins of the movement, the building blocks of Agile and Lean and the cultural changes you and your organization will need to adopt to become a successful DevOps team. In a blended mixture of theory, hands on, workshops and the use of tools such as Jenkins you will learn how to plan, organize and work in an atmosphere of collective responsibility.

PORTFOLIO, PROGRAM & PROJECT MANAGEMENT SESSIONS

Special PMP training and coaching

Specialized PMP (Project Management Professional) training and coaching typically aim to prepare individuals for the Project Management Professional certification offered by the Project Management Institute (PMI).

This training program will be covering a comprehensive coverage of the PMBOK (Project Management Body of Knowledge) Guide, which serves as the foundation for the PMP exam. This includes an in-depth review of project management processes, knowledge areas, and best practices outlined in the PMBOK. The training phase of this course occurs through Interactive Learning Sessions delivered by experienced instructors or coaches will be involving lectures, discussions, and interactive exercises to reinforce concepts and aid in understanding complex project management topics. For the coaching phase, practice questions and mock exams will help participants assess their readiness and identify areas needing further study. In addition, the participants will be examining real-world case studies ; by the analysis of real-world project management scenarios and case studies, participants will be able to apply theoretical knowledge to practical situations, for a better understanding on how to implement PMP principles in various contexts.

PROCESS MANAGEMENT

Business Process Modeling (BPM) Essentials

Our BPM training will teach you how to automate and manage a broad range of business workflows. We will examine the automation steps within a typical process in which work items are passed from one participant to another for action, according to a set of business rules. Participants will obtain first hand guidance on automated monitoring best practices as well as tips and tricks for efficient governance practices.

Price: 1.500 € excl. VAT / participant

Business Process Management (BPM) Training: modelisation for professionals

Business Process Management (BPM) Enhancing Organizational Efficiency: This training program focuses on methodologies aimed at enhancing the efficiency and effectiveness of processes within an organization. Courses in Business Process Modeling cover a range of topics to equip individuals with the necessary skills to understand, analyze, and optimize business processes. The BPM training covers concepts, methods, and tools necessary for effectively managing business processes. Participants acquire practical skills to design, implement, and improve operational processes, potentially leading to enhanced organizational performance and greater business agility.

LEAN IT Startup

The concept of "Lean Startup" is a methodology for business development focused on creating and managing startups and innovative projects.

This approach, popularized by Eric Ries, aims to reduce risks associated with launching new products or services by adopting an iterative and customer-centric methodology. The Lean Startup aims to minimize waste by avoiding the development of expensive and complex products that might not meet market needs. By adopting an agile approach, based on rapid testing and continuous adjustments, startups can be more responsive and increase their chances of success in the market.

AI for the Project Manager

The aim of the Project Manager training incorporating AI is to equip project management experts with the skills needed to seamlessly integrate and apply artificial intelligence (AI) technologies throughout project management phases, including execution and delivery. Incorporating AI in project management will provide an in-depth understanding of AI concepts, algorithms, and specific applications relevant to project management. Furthermore, this course will cover how to integrate AI tools and techniques into each phase of a project's lifecycle, (from planning to execution, monitoring, and closure) and how to effectively collect, manage, and analyze data to make informed decisions. The overarching objective of this training is to equip project managers to strategically integrate AI tools and concepts to enhance the efficiency, quality, and success of the projects they oversee.

Manage your projects with AI tools, based on prompt engineering

This course is an immersive exploration into the integration of Artificial Intelligence (AI) tools, specifically leveraging prompt engineering techniques, to streamline and enhance project management methodologies. Participants will delve into the symbiotic relationship between cutting-edge AI technologies, like ChatGPT, and the innovative concept of prompt engineering to optimize project workflows. Throughout this training, individuals will gain insights into crafting tailored prompts that elicit precise AI-driven responses, empowering them to efficiently communicate, strategize, and problem-solve within project environments.

AI for management : from understanding to action **[New]**

This AI training is specifically addressed to deciders, CEO's, CTO's or consultants who wish to integrate AI in a strategic and operational way within their organizations. Structured in 4 successive steps, it offers a balance between theory, thinking strategy and practice. A follow-up one month after the course is proposed online in order to follow-up on participants overtime. The AI basics are approached in an accessible way in order to give a clear overview of the possibilities and risks relative to AI technologies. Then a co-construction session favors collective thinking on automating intellectual tasks and their impacts on work processes. Finally a practical workshop guides participants on identifying their automated key processes. The experience and pedagogical approach guarantee a pragmatic training, accessible et directly actionable, meant to lead organizations sponsors in their AI transformation.

SCALED AGILE FRAMEWORK - SAFE		SESSIONS
	SAFe Agile Software Engineering <i>(Exam included)</i> The discipline of software engineering has evolved over the past decades with the introduction of Lean-Agile and DevOps principles and practices. New skills and approaches help organizations deliver software-centric solutions faster, more predictably, and with higher quality. During this three-day workshop-oriented course, attendees learn the foundational principles and practices that make up the Agile Software Engineering discipline. <i>Price: 2.995 € excl. VAT / participant</i>	English in Bru. & Lux. Also available in FR or NL, contact us for more information Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60
	SAFe DevOps <i>(Exam included)</i> To compete in a disruptive global market, every organization needs to deliver valuable technology solutions at the speed of business. This requires a shared DevOps mindset among all the people needed to define, build, test, deploy, and release software-driven systems — not just the engineers operating a CI/CD pipeline. The two-day, interactive SAFe® DevOps course helps people across technical, non-technical, and leadership roles work together to optimize their value stream from end to end. Attendees will learn what DevOps is, why it is important to every role, and design a continuous delivery pipeline that is tailored to their business. Attendees work in cross-functional teams to map their current state value stream from concept to cash, identify major bottlenecks to flow, and build an actionable implementation plan that will accelerate the benefits of DevOps in their organization. <i>Price: 1.495 € excl. VAT / participant</i>	English in Bru. & Lux. Also available in FR or NL, contact us for more information Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60
	SAFe Product Owner / Product Manager <i>(Exam included)</i> As a product owner or product manager, you are the embodiment of vision and direction for your team. In this 2-day training, you set out to learn about Lean thinking, breaking down epics into features and stories and how to drive increments towards continuous delivery. You'll get an overview of the Lean-Agile mindset, and an understanding of how the Product Owner and Product Manager roles operate in the enterprise to drive the delivery of the Agile Release Train (ART). Finally, you will get an in-depth understanding of the specific activities, tools, and mechanics used to effectively deliver value to the enterprise. <i>Price: 1.495 € excl. 	SAFe Scrum Master <i>(Exam included)</i> As a scrum master you are a servant leader, facilitator and coach for an agile team. During this 2 day training, you will learn what this means when applying it in a SAFe context. You will learn how SAFe scrum masters implement and support the SAFe principles and practices and how they facilitate SAFe events on both the Team and Program level. SAFe scrum masters coach their teams in scrumXP and SAFe and assist the team in picking the best practices from a variety of methodologies (scrum, Kanban, XP, ...). They foster relentless improvement, innovation and flow to achieve the sustainably shortest lead-time and the highest business value delivery while maintaining high quality standards. <i>Price: 1.495 € excl. 	AZ-305 - Designing Microsoft Azure Infrastructure Solutions [Most wanted] This course teaches Azure Solution Architects how to design infrastructure solutions. Course topics cover governance, compute, application architecture, storage, data integration, authentication and identity, networks, high availability, business continuity, and migrations. The course combines lecture with case studies to demonstrate basic architect design principles. <i>This course prepares for the Microsoft exam AZ-305</i> <i>Price: 2.000 € excl. VAT / participant</i>	Dutch in Brussels 04-05-06-07 February 14-15-16-17 April 07-08-09-10 October 01-02-03-04 December FR & EN in Bru. & Lux. 03-04-05-06 March 03-04-05-06 June 02-03-04-05 September 18-19-20-21 November

AZURE		SESSIONS
	AZ-400 - Designing and implementing Microsoft DevOps Solutions This course teaches DevOps professionals how to design and implement DevOps practices for version control, compliance, infrastructure as code, configuration management, build, release, and testing by using Azure technologies. Candidates must be proficient with Agile practices. They must be familiar with both Azure administration and Azure development and experts in at least one of these areas. <i>This course prepares for the Microsoft exam AZ-400</i> <i>Price: 2.000 € excl. VAT / participant</i>	Dutch in Brussels 03-04-05-06 February 14-15-16-17 April 30 September - 01-02-03 October 02-03-04-05 December FR & EN in Bru. & Lux. 21-22-23-24 January 31 March - 01-02-03 April 02-03-04-05 September 03-04-05-06 November
	AZ-500 - Microsoft Azure Security Technologies [Most wanted] In this course students will gain the knowledge and skills needed to implement security controls, maintain the security posture, and identify and remediate vulnerabilities by using a variety of security tools. The course covers scripting and automation, virtualization, and cloud N-tier architecture. Candidates must be proficient with Agile practices. They must be familiar with both Azure administration and Azure development and experts in at least one of these areas. <i>This course prepares for the Microsoft exam AZ-500</i> <i>Price: 2.000 € excl. VAT / participant</i>	Dutch in Brussels 03-04-05-06 March 03-04-05-06 June 06-07-08-09 October 15-16-17-18 December FR & EN in Bru. & Lux. 24-25-26-27 February 06-07-08-09 May 09-10-11-12 September 24-25-26-27 November
	AZ-700 - Designing and Implementing Microsoft Azure Networking Solutions This course teaches Network Engineers how to design, implement, and maintain Azure networking solutions. This course covers the process of designing, implementing, and managing core Azure networking infrastructure, Hybrid Networking connections, load balancing traffic, network routing, private access to Azure services, network security and monitoring. <i>This course prepares for the Microsoft exam AZ-700</i> <i>Price: 1.400 € excl. VAT / participant</i>	English virtual class 28-29-30 January 18-19-20 March 06-07-08 May 24-25-26 June 26-27-28 August 21-22-23 October 09-10-11 December
	AZ-800 - Administering Windows Server Hybrid Core Infrastructure [Most wanted] This course teaches administration of core Windows Server workloads using on-premises, hybrid, and cloud technologies. This course covers implementing and managing on-premises and hybrid solutions, such as identity, management, compute, networking, and storage using administrative tools and technologies, such as Windows Admin Center, PowerShell, Azure Arc, and IaaS virtual machine administration. <i>This course prepares for the Microsoft exam AZ-800</i> <i>Price: 2.000 € excl. AZURE		SESSIONS
	AZ-900 - Microsoft Azure Fundamentals [Most wanted] This course will provide foundational level knowledge of cloud services, and how cloud services are provided with Microsoft Azure. The course can be taken as an optional first step in learning about cloud services and Microsoft Azure. Candidates must be proficient with Agile practices. They must be familiar with both Azure administration and Azure development and experts in at least one of these areas. <i>This course prepares for the Microsoft exam AZ-900</i> <i>Price: 1000 € excl. VAT / participant</i>	Dutch in Brussels 24 January 17 March 26 May 03 October 01 December FR & EN in Bru. & Lux. 07 February 25 April 04 July 08 September 14 November
	AI-102 - Designing and Implementing an Azure AI Solution This course teaches the concepts of Azure AI engineering by presenting, and developing, a scenario that creates a customer support Bot that utilizes various tools and services in the Azure AI landscape like language understanding, QnA Maker, and various Azure Cognitive Services to implement language detection, text analytics, and computer vision. <i>Price: 2.000 € excl. VAT / participant</i>	English in Bru. & Lux. 04-05-06-07 February 22-23-24-25 April 01-02-03-04 September 18-19-20-21 November
	DP-900 - Microsoft Azure Data Fundamentals In this course, students will learn the fundamentals of database concepts in a cloud environment, get basic skilling in cloud data services, and build their foundational knowledge of cloud data services within Microsoft Azure. Students will identify and describe core data concepts such as relational, non-relational, big data, and analytics, and explore how this technology is implemented with Microsoft Azure. They will explore the roles, tasks, and responsibilities in the world of data. The students will explore relational data offerings, provisioning and deploying relational databases, and querying relational data through cloud data solutions with Microsoft Azure. They will explore non-relational data offerings, provisioning and deploying non-relational databases, and non-relational data stores with Microsoft Azure. Students will explore the processing options available for building data analytics solutions in Azure. They will explore Azure Synapse Analytics, Azure Databricks, and Azure HDInsight. Students will learn what Power BI is, including its building blocks and how they work together. <i>Price: 550 € excl. VAT / participant</i>	English in Bru. & Lux. 07 February 28 April 29 September 28 November
	Team Development with Azure DevOps In this course you will learn about using Azure DevOps, formerly known as Visual Studio Team Services (VSTS), to manage the application development lifecycle. This training will show you the role of the project manager, developer and tester in this process and how DevOps can improve the efficiency and code quality of your team. You will perform project management, source control (no real coding skill required for the exercise), testing and build automation with Azure DevOps. <i>Price: 1.400 € excl. VAT / participant</i>	English virtual class 03-04-05 March 28-29-30 April 23-24-25 June 11-12-13 August 06-07-08 October 15-16-17 December
	Managing Containers with Kubernetes and Microsoft Azure In this course students will learn to build Docker containers on both Windows and Linux. They will use Docker Compose and Docker Swarm to manage and maintain multi-layered applications on different container hosts. Students will deploy a Kubernetes cluster and learn how Kubernetes handles the deployment of applications across various nodes. <i>Price: 1.400 € excl. VAT / participant</i>	English virtual class 17-18-19 February 12-13-14 May 18-19-20 August 27-28-29 October
	Microsoft Endpoint Manager: Configuring Devices with Microsoft Intune [Most wanted] Microsoft Endpoint Manager is a single, integrated endpoint management platform for all your endpoints. It integrates Configuration Manager and Microsoft Intune. This course focuses on Intune: a cloud-based service in the enterprise mobility management (EMM) space that helps enable your workforce to be productive while keeping your corporate data protected. <i>Price: 1.400 € excl. VAT / participant</i>	English virtual class 13-14-15 January 28-29-30 April 10-11-12 June 04-05-06 August 22-23-24 September 12-13-14 November

AZURE		SESSIONS
	Developing AI-Powered Apps with C# and Azure AI In this course, you will learn to seamlessly integrate pre-built AI services and Large Language Models such as ChatGPT and Phi into your .NET development projects. The course will teach you how to use your own data with Large Language Models using Azure AI Search. Furthermore, you will gain hands-on experience with AI libraries such as Semantic Kernel. This course will equip you with the skills to integrate advanced AI capabilities to your software solutions without needing to be a data scientist. <i>Price: 1.400 € excl. VAT / participant</i>	English virtual class 17-18-19 February 07-08-09 April 02-03-04 June 04-05-06 August 22-23-24 September 12-13-14 November
	Data Engineering on Microsoft Azure [New] In this training the modern data warehouse approach to handling any volume of both cloud based as well as on-prem data is explained in detail. First students see how to setup an Azure Data Lake and inject data with Azure Data Factory. Then students learn how to cleanse the data and prepare it for analysis with Azure Synapse Analytics and Azure DataBricks. <i>Price: 2.100 € excl. VAT / participant</i>	English virtual class 10-11-12-13-14 February 07-08-09-10-11 April 02-03-04-05-06 June 04-05-06-07-08 August 29-30 September - 01-02-03 October 08-09-10-11-12 December
	Developing AI-Powered Apps with Python and Azure AI Studio [New] This course equips participants to develop, design and deploy AI solutions using Azure AI Studio. You'll learn to collaborate on projects, manage resources, and use advanced AI techniques like prompt engineering, retrieval augmented generation, and AI orchestration frameworks in Python like Prompt Flow and Langchain. The course also covers fine-tuning models for accuracy, ensuring responsible AI practices, and monitoring applications in production. <i>Price: 1.750 € excl. VAT / participant</i>	English virtual class 24-25-26-27 February 22-23-24-25 April 10-11-12-13 June 11-12-13-14 August 20-21-22-23 October
	Building your own Models with Azure Machine Learning [New] In many AI solutions pre-trained models (such as chat-GPT) are used. But in some cases, custom models trained on your corporate data is essential to make predictions within your business processes. This training focusses on the latter. First you will learn how to train models locally using Python. Then the focus shifts on how Azure Machine Learning provides extra features, such as scale out training, easy deployment and monitoring. <i>Price: 1.400 € excl. VAT / participant</i>	English virtual class 24-25-26 March 16-17-18 June 08-09-10 September 12-13-14 November
	Data Engineering with Azure Databricks [New] Databricks is a data analytics platform powered by Apache Spark for data engineering, data science, and machine learning. This training teaches how to use Azure Databricks to design and build a data lakehouse architecture. <i>Price: 1.750 € excl. VAT / participant</i>	English virtual class 17-18-19-20 February 14-15-16-17 April 30 June - 01-02-03 July 22-23-24-25 September 01-02-03-04 December
WINDOWS 11		SESSIONS
	N° 55342B - Supporting and Troubleshooting Windows 11 [Updated] This is a 4-day ILT course that is designed to provide students with the knowledge and skills required to support and troubleshoot Windows 11 PCs and devices in an on-premises Windows Server Active Directory domain environment. These skills include understanding: • Important Windows 11 features • How these features are used in an Active Directory • How to troubleshoot these features This course is fully updated to Windows 11 version 23H2 and includes an overview of Windows Copilot. <i>Price: 2.000 € excl. VAT / participant</i>	Dutch in Brussels 18-19-20-21 March 23-24-25-26 June 08-09-10-11 September 25-26-27-28 November French in Bru. & Lux. 04-05-06-07 February 05-06-07-08 May 06-07-08-09 October 01-02-03-04 December

	N° 55345B - Implementing and Managing Windows 11 [New]	Dutch in Brussels 28-29-30-31 January 22-23-24-25 April 02-03-04-05 September 03-04-05-06 November
	Course 55345B is the Community Courseware equivalent of retired MOC Course 20697-1D - Implementing and Managing Windows 10. This is a 4-day ILT course designed to provide you with the knowledge and skills required to install and configure Windows 11 desktops and devices in an on-premises Windows Server Active Directory domain environment. <i>Price: 2.000 € excl. VAT / participant</i>	French in Bru. & Lux. 18-19-20-21 February 19-20-21-22 May 14-15-16-17 October 08-09-10-11 December
	N° 55615A - Deploying and Managing Windows 11 with Microsoft Configuration Manager and Intune [New]	Dutch in Brussels 17-18-19 February 19-20-21 May 22-23-24 October 10-11-12 December
	This workshop is designed to help you plan, test, and validate your deployment and management of desktops running Windows 10 Enterprise, Windows 11 Enterprise, and Microsoft 365 Apps for enterprise. The workshop and labs cover using Microsoft Configuration Manager, Office Customization Tool, OneDrive, Windows Autopilot and more. <i>Price: 1.450 € excl. VAT / participant</i>	French in Bru. & Lux. 29-30-31 January 16-17-18 April 15-16-17 September 17-18-19 November
	BT-MDT10 - Deploying Windows 10/11 with Microsoft Deployment Toolkit (MDT)	English in Bru. & Lux. 17-18-19-20 February 17-18-19-20 June 17-18-19-20 November
	This topic will walk you through the steps necessary to create the server structure required to deploy the Windows 10/11 operating system using the Microsoft Deployment Toolkit (MDT). It covers the installation of the necessary system prerequisites, the creation of shared folders and service accounts, and the configuration of security permissions in the files system and in Active Directory. <i>Price: 2.000 € excl. VAT / participant</i>	
	MD-102 - Microsoft 365 Endpoint Administrator	Dutch in Brussels 27-28-29-30-31 January 07-08-09-10-11 April 06-07-08-09-10 October 01-02-03-04-05 December
	In this course, students will learn to plan and execute an endpoint deployment strategy using contemporary deployment techniques and implementing update strategies. The course introduces essential elements of modern management, co-management approaches, and Microsoft Intune integration. It covers app deployment, management of browser-based applications, and key security concepts such as authentication, identities, access, and compliance policies. Technologies like Microsoft Entra ID, Azure Information Protection, and Microsoft Defender for Endpoint are explored to protect devices and data. The Microsoft 365 Endpoint Administrator is responsible for deploying, configuring, securing, managing, and monitoring devices and client applications in a corporate setting. They should be well-versed in M365 workloads and possess extensive skills and experience in deploying, configuring, and maintaining Windows 11 and later, as well as non-Windows devices. Their role emphasizes cloud services over on-premises management technologies. <i>This course prepares for the Microsoft exam MD-102</i> <i>Price: 2.250 € excl. VAT / participant</i>	French in Bru. & Lux. 17-18-19-20-21 February 12-13-14-15-16 May 15-16-17-18-19 September 24-25-26-27-28 November

Most of our trainings are available in several languages, don't hesitate to contact us, we will organize extra sessions as from 4 students.

MICROSOFT 365		SESSIONS
	MS-102 Microsoft 365 Administrator [Most wanted]	English in Bru. & Lux 03-04-05-06-07 February 12-13-14-15-16 May 08-09-10-11-12 September 24-25-26-27-28 November
	This course covers the following key elements of Microsoft 365 administration: Microsoft 365 tenant management , Microsoft 365 identity synchronization , and Microsoft 365 security and compliance . In Microsoft 365 tenant management , you learn how to configure all the options, component services, user accounts and licenses, security groups, and administrative roles. You then transition to configuring Microsoft 365, with a primary focus on configuring Office client connectivity. Finally, you explore how to manage user-driven client installations of Microsoft 365 Apps for enterprise deployments. The course then transitions to an in-depth examination of Microsoft 365 identity synchronization. In Microsoft 365 security management , you begin examining the common types of threat vectors and data breaches facing organizations today, and how MS 365's security solutions address each of these threats. You are introduced to the MS Secure Score, as well as to Microsoft Entra ID Protection. You then learn how to manage the Microsoft 365 security services, including Exchange Online Protection, Safe Attachments, and Safe Links. Finally, you are introduced to the various reports that monitor an organization's security health. You then transition from security services to threat intelligence; specifically, using Microsoft 365 Defender, Microsoft Defender for Cloud Apps, and Microsoft Defender for Endpoint. The Microsoft 365 compliance management begins with an overview of all key aspects of data governance, including data archiving and retention, Microsoft Purview message encryption, and data loss prevention (DLP). You then delve deeper into archiving and retention, paying particular attention to Microsoft Purview insider risk management, information barriers, and DLP policies. You then examine how to implement these compliance features by using data classification and sensitivity labels. <i>This course prepares for the Microsoft exam MS-102</i> <i>Price: 2.250 € excl. VAT / participant</i>	French in Bru. & Lux. 03-04-05-06-07 March 02-03-04-05-06 June 06-07-08-09-10 October 01-02-03-04-05 December
	Modern Microsoft 365 Development [New]	English virtual class 27-28-29-30 January 22-23-24-25 April 10-11-12-13 June 11-12-13-14 August 13-14-15-16 October 15-16-17-18 December
	Microsoft 365 offers exciting and contemporary ways to develop for SharePoint, Microsoft Teams, and other parts of Microsoft 365. This course will teach you the essential knowledge, best practices, tools and techniques for adding your .NET creations to the Microsoft 365 ecosystem. With this course, you'll be able to create stunning and collaborative applications. <i>Price: 1.750 € excl. VAT / participant</i>	
	MS-721 - Collaboration Communications Systems Engineer	Dutch in Brussels 10-11-12-13 March 10-11-12-13 June 13-14-15-16 October 09-10-11-12 December
	This training course is designed to give participants the knowledge and skills to become a Collaboration Communications Systems Engineer. Participants should understand the fundamentals of networking, telecommunications, audio/visual and meeting room technologies, identity and access management, and Microsoft Teams. They will gain hands-on experience configuring and deploying Microsoft Teams Phone, meetings and certified devices including Microsoft Teams Rooms and Surface Hub. The course will also cover how to manage and monitor Teams Phone, meetings, and certified devices using the Microsoft Teams admin center, PowerShell, the Microsoft Teams Rooms Pro Portal, and the Call Quality Dashboard. In addition, the course will cover configuring and deploying Microsoft Teams Phone with PSTN connectivity through Microsoft Calling Plans, Operator Connect, Teams Phone Mobile, and Direct Routing. <i>This course prepares for the Microsoft exam MS-721</i> <i>Price: 2.000 € excl. VAT / participant</i>	French in Bru. & Lux. 17-18-19-20 February 12-13-14-15 May 08-09-10-11 September 18-19-20-21 November

Most of our trainings are available in several languages, don't hesitate to contact us, we will organize extra sessions as from 4 students.

MICROSOFT 365		SESSIONS
	Microsoft 365 Cloud Security [New] Securing your on-prem or cloud infrastructure can be complex and challenging in today's world where users are working from any location on different devices. To support organizations in protecting themselves from several kinds of attacks, Microsoft offers a broad range of cloud security services. This 3-day training will make you familiar with the tools that help you protect and secure your identities, your devices, your apps and your information in Microsoft 365. <i>Price: 1.400 € excl. VAT / participant</i>	English virtual class 13-14-15 January 10-11-12 March 19-20-21 May 14-15-16 July 15-16-17 September 17-18-19 November
	Microsoft 365 MS-900 - Microsoft 365 Fundamentals This course provides foundational knowledge on the considerations and benefits of adopting cloud services and the Software as a Service (SaaS) cloud model, with a specific focus on Microsoft 365 cloud service offerings. You will begin by learning about cloud fundamentals, including an overview of cloud computing and specifically Microsoft cloud services. You will be introduced to Microsoft Azure, and you will examine the differences between Microsoft 365 and Office 365. You will then perform an in-depth review of Microsoft 365, including a comparison of Microsoft on-premises services versus Microsoft 365 cloud services, a review of enterprise mobility in Microsoft 365, and an analysis of how Microsoft 365 services provide collaboration. The course then analyzes how security, compliance, privacy, and trust are handled in Microsoft 365, and it concludes with a review of Microsoft 365 subscriptions, licenses, billing, and support. <i>This course prepares for the Microsoft exam MS-900</i> <i>Price: 550 € excl. VAT / participant</i>	English in Bru. & Lux. 25 April 20 June 22 August French in Bru. & Lux. 24 January 29 January 29 September 28 November
	Power Apps and Power Automate: Advanced Patterns This training mainly covers more complex deployment concepts like Environments, Solutions, ALM with the Power Platform CLI, ... You will get acquainted with more advanced topics like Environment Variables, Connection References and using Microsoft Dataverse as a data source for Canvas Apps and Power Automate. <i>Price: 1.400 € excl. VAT / participant</i>	English in Bru. & Lux. 13-14-15 January 17-18-19 March 19-20-21 May 14-15-16 July 15-16-17 September 12-13-14 November
	PL-200 - Microsoft Power Platform Functional Consultant The Power Platform empowers organizations to automate business processes, develop their own rich app experiences, and connect with customers better and faster. In this course, students will learn to perform discovery, capture requirements, engage subject matter experts and stakeholders, translate requirements, and configure Power Platform solutions and apps. They will supplement their learnings with hands-on labs to create application enhancements, custom user experiences, system integrations, data conversions, custom process automation, and custom visualizations. Power Platform is comprised of four key products: Power Apps, Power Automate, Power BI, and Power Virtual Agents. In this course, we will cover these four applications in depth, with additional focus on the Common Data Service, AI Builder, connectors, and portals. <i>This course prepares for the Microsoft exam PL-200</i> <i>Price: 1.750 € excl. VAT / participant</i>	English in Bru. & Lux. 10-11-12-13-14 February 05-06-07-08-09 May 08-09-10-11-12 September 24-25-26-27-28 November
	PL-400 - Microsoft Power Platform Developer The Microsoft Power Platform helps organizations optimize their operations by simplifying, automating and transforming business tasks and processes. In this course, students will learn how to build Power Apps, Automate Flows and extend the platform to complete business requirements and solve complex business problems. <i>This course prepares for the Microsoft exam PL-400</i> <i>Price: 2.150 € excl. VAT / participant</i>	English in Bru. & Lux. 27-28-29-30-31 January 14-15-16-17-18 April 15-16-17-18-19 September 01-02-03-04-05 December

MICROSOFT 365		SESSIONS
	PL-600 - Microsoft Power Platform Solution Architect The Solution Architect is responsible for the successful design, implementation, deployment and adoption of an overall solution. The Solution Architect ensures that the solution meets the customer's needs now and in the future. In this course, students will learn about decisions a Solution Architect makes during an implementation, covering security, integrations, Power Apps architecture, Power Automate architecture, and more. <i>Price: 1.500 € excl. VAT / participant</i>	English in Bru. & Lux. 03-04-05 March 04-05-06 June 06-07-08 October 15-16-17 December
	PL-900 - Microsoft Power Platform Fundamentals Learn the business value and product capabilities of Power Platform. Create simple Power Apps, connect data with Common Data Service, build a Power BI Dashboard, automate a process with Power Automate, and build a chatbot with Power Virtual Agents. <i>This course prepares for the Microsoft exam PL-900</i> <i>Price: 500 € excl. VAT / participant</i>	English in Bru. & Lux. 24 February 26 May 05 September 03 November
	Create Low-code Business Websites with MS Power Pages This training will teach low-code makers and developers how to create external-facing business websites using Power Pages. With Power Pages, you can quickly build web sites by using the same shared business data stored in Microsoft Dataverse that you use for building apps and workflows. External users can either access your Dataverse data anonymously or through commercial authentication providers like Azure AD B2C, Facebook, Google,.... <i>Price: 1.400 € excl. VAT / participant</i>	English in Bru. & Lux. 27-28-29 January 07-08-09 April 23-24-25 June 08-09-10 September 24-25-26 November
	Building Smart Solutions with AI Builder and Microsoft Syntex AI Builder is a user-friendly tool that allows you to easily create custom Artificial Intelligence (AI) models to automate processes, gain insights, and improve decision-making. It is designed to be accessible to users without extensive technical expertise, and integrates seamlessly with other Microsoft products like Power Apps and Power Automate. In this course, you will learn how to train and use AI models and integrate these with your own Power Apps or Power Automate flows. Microsoft Syntex integrates AI in SharePoint. You will learn how to extract information and insights from unstructured data and documents by using the Microsoft Syntex capabilities. <i>Price: 950 € excl. VAT / participant</i>	English in Bru. & Lux. 06-07 February 10-11 April 26-27 June 11-12 September 13-14 November
	Model-Driven Apps with Microsoft Dataverse in Power Apps Built on the fundamentals of Dynamics 365, Model-Driven Apps allow you to build complex and sophisticated business apps without writing code. Follow this 5-day training and become an expert in Model-driven app design, Microsoft Dataverse and the integration with other components of the Power Platform like Power BI, Canvas Apps and Power Automate. <i>Price: 2.100 € excl. VAT / participant</i>	English in Bru. & Lux. 03-04-05-06-07 February 31 March - 01-02-03-04 April 19-20-21-22-23 May 14-15-16-17-18 July 15-16-17-18-19 September 17-18-19-20-21 November
	Microsoft Power Apps and Power Automate Microsoft Power Apps and Microsoft Power Automate are part of Microsoft's Power Platform, which allows citizen developers to create powerful business applications without any development. In this course, you will learn how to build Canvas Apps and Flows connected to your data. <i>Price: 1.750 € excl. Building your Own Copilot with Copilot Studio [New]

Microsoft Copilot Studio allows you to create agents or bots through a no-code graphical interface without having to be an AI developer or data scientist. Microsoft Copilot Studio lets you quickly create and publish agents to Microsoft 365 or any external site based on your own unique business needs. This course gets you up and running with Microsoft Copilot Studio so you can quickly start building your own agents.

N° 4004A - Empower your workforce with Microsoft 365 Copilot Use Cases [New]

This one-day course is composed of two parts - Getting started with Microsoft 365 Copilot and Empower your workforce with Microsoft 365 Copilot Use Cases. The first part of the course introduces you to Copilot for Microsoft 365, examines how you can use Copilot throughout the various Microsoft 365 apps, explores best practices for using Copilot and building effective prompts, and examines how you can extend Copilot. The second part of this training content is really the heart of this course. Students perform a series of hands-on exercises involving seven Use Cases - Executives, Sales, Marketing, Finance, IT, HR, and Operations. These exercises focus on using Copilot in various Microsoft 365 apps (such as Word, PowerPoint, Outlook, and so on) to complete a series of common business-related tasks pertaining to each Use Case. To complete the Use Case exercises in this course, each student must have access to a Microsoft 365 subscription (BYOS) in which they're licensed to use Microsoft 365 Copilot. Each student must also have a Microsoft OneDrive account, since Copilot requires OneDrive to complete the file sharing tasks used throughout the Use Case exercises.

Developing Distributed Applications with Azure and .NET Aspire [New]

Dive into the future of scalable software design with our course on Distributed Applications using Azure and .NET Aspire. This course is designed for developers looking to master the art of building robust, high-performance distributed systems. Use .NET Aspire to design, implement, and manage applications that are resilient, scalable, and ready to meet the demands of modern business environments. You will explore microservices architecture, learn best practices for inter-service communication, and utilize cloud-native technologies to deploy and manage your distributed applications. Whether you're building real-time data processing systems, complex web services, or scalable cloud solutions, this course gives you the skills you need.

WINDOWS SERVER		SESSIONS
	N° 20740WV - Installation, Storage, and Compute with Windows Server 2022 [New] This is a 5-day entry-level course on Windows Server 2022. It covers planning, installing, and managing storage and computing services. This course also covers the scenarios, requirements, and options that are available and applicable to Windows Server 2022, including installing and configuring Microsoft Hyper-V and implementing failover clustering for Hyper-V virtual machines. <i>Price: 2.250 € excl. VAT / participant</i>	Dutch in Brussels 10-11-12-13-14 February 05-06-07-08-09 May 20-21-22-23-24 October 15-16-17-18-19 December French in Bru. & Lux. 20-21-22-23-24 January 07-08-09-10-11 April 08-09-10-11-12 September 24-25-26-27-28 November
	N° 20741WV - Networking with Windows Server [New] This 5-day course examines the services and features of Windows Server 2022. The course covers key technologies and provides the skills required to implement, configure, integrate, and support Windows Server networking, while covering IP fundamentals, automatic IP addressing, IP address management, name resolution, remote access, and advanced networking infrastructure. <i>Price: 2.250 € excl. VAT / participant</i>	Dutch in Brussels 03-04-05-06-07 February 14-15-16-17-18 April 30 June - 01-02-03-04 July 22-23-24-25-26 September French in Bru. & Lux. 10-11-12-13-14 March 16-17-18-19-20 June 15-16-17-18-19 September 27-28-29-30-31 October
	N° 20742WV - Identity with Windows Server [New] This 5-day course examines the services and features of Microsoft Windows Server 2022. It covers administering, configuring, troubleshooting, and operating identity services in the Active Directory Domain Services (AD DS) and Entra ID (previously known as Azure AD). This course also covers core AD DS identity services such as Group Policy Objects (GPOs), Active Directory Certificate Services (AD CS), Active Directory Federation Services (AD FS) and hybrid solutions with Azure AD. <i>Price: 2.250 € excl. VAT / participant</i>	Dutch in Brussels 03-04-05-06-07 March 02-03-04-05-06 June 06-07-08-09-10 October 01-02-03-04-05 December French in Bru. & Lux. 24-25-26-27-28 February 19-20-21-22-23 May 29-30 September - 01-02-03 October 17-18-19-20-21 November
	N° 55343 - Networking with Windows Server [New] This 5-day classroom-based course provides the fundamental networking skills required to deploy and support Windows Server in most organizations. It covers IP fundamentals, remote access technologies, and more advanced content including Software Defined Networking. Although this course and the associated labs are written for Windows Server 2022, the skills taught will also be backwards compatible for Server 2016 and Server 2019. This course is the equivalent of the retired legacy MOC 20741BC. <i>Price: 2.250 € excl. VAT / participant</i>	Dutch in Brussels 10-11-12-13-14 February 12-13-14-15-16 May 20-21-22-23-24 October 15-16-17-18-19 December French in Bru. & Lux. 27-28-29-30-31 January 14-15-16-17-18 April 15-16-17-18-19 September 17-18-19-20-21 November
	N° 55152 - Fundamentals of Active Directory [New] Fundamentals of Active Directory will serve as your leap into the world of Active Directory and infrastructure management. In this one day instructor-led course, you learn how and why Active Directory was developed by Microsoft, the fundamental architecture, basic design, management, as well as security and fundamentals for cloud integration with services like Azure. <i>Price: 550 € excl. VAT / participant</i>	Dutch in Brussels 21 February 19 May 20 October 15 December French in Bru. & Lux. 24 January 25 April 22 September 24 November

NETWORKING & OPERATING MANAGEMENT		SESSIONS
	N° 55039 - Windows PowerShell Scripting and Toolmaking [Updated] This five-day instructor-led is intended for IT professionals who are interested in furthering their skills in Windows PowerShell and administrative automation. The course assumes a basic working knowledge of PowerShell as an interactive command-line shell, and teaches students the correct patterns and practices for building reusable, tightly scoped units of automation. This version of the course is more comprehensive, but is not as conducive to in-class learning as the A version. <i>Price: 2.150 € excl. VAT / participant</i>	Dutch in Brussels 03-04-05-06-07 March 02-03-04-05-06 June 22-23-24-25-26 September 24-25-26-27-28 November French in Bru. & Lux. 17-18-19-20-21 February 19-20-21-22-23 May 13-14-15-16-17 October 08-09-10-11-12 December
	Mastering PowerShell PowerShell is a task automation and configuration management framework from Microsoft, consisting of a command-line shell and associated scripting language. Initially a Windows component only, known as Windows PowerShell, it was made open-source and cross-platform in 2016 with the introduction of PowerShell Core. The former is built on .NET Framework while the latter on .NET Core. <i>Price: 2.100 € excl. 	Cloud Operations on AWS In this course, you will learn the fundamental concepts of cloud computing and how a cloud strategy can help companies meet business objectives. It explores the advantages and possibilities of cloud computing. It also introduces addresses concepts such as security and compliance to help facilitate better discussions with line of business (LOB) professionals, information technology (IT) LoB, IT leaders, and executives. <i>Price: 2.095 € excl. VAT / participant</i>	English virtual Class 20-21-22 January 10-11-12 March 07-08-09 July 27-28-29 October 15-16-17 December Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60
	Data Warehousing on AWS Learn how to use AWS security services to stay secure in the AWS Cloud. Enhance the security of your data and systems in the cloud with AWS-recommended security practices. In this course, you'll explore the security features of AWS key services, including compute, storage, networking, and database services. You'll also learn how to use AWS services and tools for automation, continuous monitoring and logging, and responding to security incidents. <i>Price: 2.195 € excl. VAT / participant</i>	English virtual Class 15-16-17 January 16-17-18 July 22-23-24 October Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60
	AWS Cloud Essentials for Business Leaders In this course, you will learn the fundamental concepts of cloud computing and how a cloud strategy can help companies meet business objectives. It explores the advantages and possibilities of cloud computing. It also introduces addresses concepts such as security and compliance to help facilitate better discussions with line of business (LOB) professionals, information technology (IT) LoB, IT leaders, and executives. <i>Price: 695 € excl. Most of our trainings are available in several languages, don't hesitate to contact us, we will organize extra sessions as from 4 students.

AMAZON WEB SERVICES		SESSIONS
	AWS Cloud Practitioner Essentials [New] The fundamental-level full day course is intended for individuals who seek an overall understanding of the AWS Cloud, independent of specific technical roles. It provides a detailed overview of cloud concepts, AWS services, security, architecture, pricing, and support. It includes lab exercises reinforcing some of the core concepts of the lecture. This course also helps you prepare for the AWS Certified Cloud Practitioner exam. <i>Price: 695 € excl. VAT / participant</i>	English virtual Class 16 January 08 April 10 July 13 October Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60
	Amazon AWS Essentials [New] In this course, you will be introduced to AWS platform terminology and concepts. The course provides you with the fundamentals to become more proficient in identifying AWS services so that you can make informed decisions about IT solutions based on your business requirements and get started working on AWS. Participants need to be familiar with system administration and/or networking concepts <i>Price: 950 € excl. VAT / participant</i>	Dutch in Brussels 15-16 January 11-12 March 16-17 September 18-19 November French in Bru. & Lux. 05-06 February 13-14 May 14-15 October 16-17 December
SERVER APPLICATION & WEB DEVELOPMENT		SESSIONS
	WordPress for Beginners This course will give you a great start. It will take you from installing the software, adding content (including multimedia), interacting with your reader, through customising the look, and enhancing your site with plugins. <i>Price: 1.250 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 10-11 February 08-09 May 08-09 September 20-21 November
	WordPress - Advanced Course The advanced course takes your WordPress skills to the next level. You will learn how to build advanced websites for yourself and your clients; how to customise and brand administration screens; how to build an e-commerce site; how to create events booking and membership sites; how to build a truly unique theme using WordPress child theme capabilities; how to choose the right production and marketing tools for your needs. <i>Price: 1.250 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 20-21 March 19-20 June 20-21 October 15-16 December
	Python - Basics This new three days training module lets the trainees know about the potential of Python as a programming language. Open to people who already know about any structured language (like C, C++ or Java), this course teaches how de design Python scripts, perform data treatments and how to maintain a Python script collection. <i>Price: 1.695 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 27-28-29 January 24-25-26 March 21-22-23 May 14-15-16 July 15-16-17 September 17-18-19 November
	Python - Advanced This new three days training module digs deeper into the Python programming language. It teaches how to efficiently choose the appropriate Python tools, how to optimize the scripts and save tim in their design / maintenance, how to write OS/independent scripts. <i>Price: 1.695 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 03-04-05 February 07-08-09 April 04-05-06 June 25-26-27 August 20-21-22 October 10-11-12 December
	Object-Oriented Programming in C# This course teaches you how to start programming with Visual Studio, C# and .NET. You will get familiar with the C# language syntax and the .NET Object Oriented concepts, such as classes, objects, inheritance, polymorphism... In this course, you'll get a taste of the different types of applications and .NET libraries through examples in WPF, Entity Framework and ASP.NET. <i>Price: 2.100 € excl. VAT / participant</i>	English virtual or class 13-14-15-16-17 January 24-25-26-27-28 February 14-15-16-17-18 April 02-03-04-05-06 June 04-05-06-07-08 August 29-30 September - 01-02-03 October 17-18-19-20-21 November

SERVER APPLICATION & WEB DEVELOPMENT		SESSIONS
	JavaScript Fundamentals LAB - JavaScript Language Fundamentals; JavaScript Collections. Collections are a big part of OO programming, they allow you to map one-to-many or many-to-many relationships, as well as let you work with sets of data. In this module, we'll take a look at the different types of collections in JavaScript, and their uses. <i>Price: 1.400 € excl. VAT / participant</i>	English virtual or class 12-13-14 February 16-17-18 April 18-19-20 June 20-21-22 August 08-09-10 October 03-04-05 December
	Building Windows Applications with WPF Introduction to Windows programming with WPF. In this module students are introduced to Windows Presentation Foundation (WPF), and how this framework can be used to build state of the art applications. Building state of the art applications requires the input of designers for building great visualizations. <i>Price: 2.100 € excl. VAT / participant</i>	English virtual or class 03-04-05-06-07 March 30 June - 01-02-03-04 July 27-28-29-30-31 October
	Advanced .NET 8 Web Development In this advanced ASP.NET development course you will build up the necessary knowledge and tools for dealing with the complexity of modern web applications using .NET 8, Entity Framework Core, apply Clean Architecture, and get more insights into SignalR, gRPC Blazor, Azure, OpenID Connect and Internationalization. <i>Price: 2.100 € excl. 	Building Web Applications with ASP.NET This course will teach you how to build Web applications using the ASP.NET Core MVC (model-view-controller) framework and patterns in .NET 6. This includes interacting with a database using Entity Framework Core; and creating and consuming RESTful services with ASP.NET Core Web API and JavaScript. <i>Price: 2.100 € excl. VAT / participant</i>	English virtual or class 20-21-22-23-24 January 17-18-19-20-21 March 19-20-21-22-23 May 14-15-16-17-18 July 15-16-17-18-19 September 24-25-26-27-28 November
	Developing for the Power Platform with Microsoft Dataverse The goal of this module is to provide participants with an overview of the Microsoft Dataverse architecture and where the extension points are as a developer. Introduction to Dataverse Overview of the Dataverse extensibility model overview of the Power Platform SDKs that are available from Microsoft. <i>Price: 2.100 € excl. VAT / participant</i>	English virtual or class 20-21-22-23-24 January 24-25-26-27-28 March 02-03-04-05-06 June 18-19-20-21-22 August 27-28-29-30-31 October
	N° 55320 - Programming with HTML, CSS, and JavaScript This five-day instructor-led is intended for IT professionals interested in becoming client-side web developers who need to get a jump start on all three technologies. The course includes more than 30 exercises, providing a rapid hands-on introduction to the three major client-side languages: HTML, CSS, and JavaScript. Students should be prepared to cover a lot of ground quickly. Like that course, this course focuses on using HTML, CSS, and JavaScript to develop web pages, implement programming logic, define and use variables, perform looping and branching, capture and validate user input, store data, and create well-structured applications. This course does not cover the HTML5 APIs covered in 20480. This course is the equivalent of the retired legacy MOC 20480C. <i>Price: 2.250 € excl. VAT / participant</i>	Dutch in Brussels 24-25-26-27-28 March 23-24-25-26-27 June 06-07-08-09-10 October 08-09-10-11-12 December French in Bru. & Lux. 17-18-19-20-21 February 19-20-21-22-23 May 22-23-24-25-26 September 24-25-26-27-28 November

Most of our trainings are available in several languages, don't hesitate to contact us, we will organize extra sessions as from 4 students.

DEVELOPMENT - MEAN STACK		SESSIONS
	Mastering Angular Angular is a front-end web framework that allows developers to easily build dynamic, responsive single-page web. This training teaches attendees how to build applications using ES6, TypeScript, and modern front-end tools, including npm and Twitter Bootstrap. By the end of this training the attendees will gain deep understanding of the Angular fundamentals. <i>Price: 950 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 23-24 January 28-29 April 29-30 September 27-28 November
	Advanced Angular This course is intended for those that already have a basic understanding of the Angular fundamentals. It covers advanced topics like reactive programming with RxJS, unit and end-to-end tests, application state management with ngRx, lazy module loading, and token based authentication. The training provides a set of hands-on labs in order to get a deep understanding of the overmentioned advanced topics. <i>Price: 1.450 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 03-04-05 March 04-05-06 June 24-25-26 September 26-27-28 November
	Full Stack development with Angular and Spring Boot This training will take you from being an average Angular developer to a great one. You'll gain more insight in the workings of Angular and you'll explore with more advanced programming techniques like RxJS and working with Redux. Finally you will acquire the assets to make your Angular application production ready. This means minimizing load times and pleasing search engines. <i>Price: 1.750 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 11-12-13-14 February 05-06-07-08 May 16-17-18-19 September 24-25-26-27 November
CI/CD & DEVOPS		SESSIONS
	DevSecOps Essentials In this two day course you will explore the origins of the movement, the building blocks of Agile and Lean and the cultural changes you and your organization will need to adopt to become a successful DevOps team. In a blended mixture of theory, hands on, workshops and the use of tools such as Jenkins you will learn how to plan, organize and work in an atmosphere of collective responsibility. <i>Price: 950 € excl. VAT / participant</i>	English in Bru. & Lux. 03-04 February 17-18 April 23-24 June 16-17 October
	DevSecOps Fundamentals In this course, participants will learn how to build streamlined DevOps workflows which incorporate security measures at every level. A wide range of tools and technologies are used to implement these workflows. The course curriculum merges theoretical concepts with immersive, hands-on labs to develop, secure, and deploy a containerized application. <i>Price: 1450 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 03-04-05 March 04-05-06 June 01-02-03 October 01-02-03 December
	Kubernetes fundamentals This training helps to get started with Kubernetes. It is designed for beginners who have no previous experience with container orchestration or cloud technologies. The course gives an understanding of the Kubernetes cloud-native platform and then describes its structure. The course includes many Hands-on labs that teach how to deploy and configure applications on Kubernetes clusters. <i>Price: 1.450 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 03-04-05 February 05-06-07 May 10-11-12 September 08-09-10 December

CI/CD & DEVOPS		SESSIONS
	Kubernetes Security This course provides skills and knowledge across a broad range of best practices for securing container-based applications and Kubernetes platforms during build, deployment, and runtime. This training is intended for DevOps engineers, SysOps and ITOps specialists, participants need knowledge in core container and Kubernetes concepts. <i>Price: 1450 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 17-18-19 March 18-19-20 June 17-18-19 November
	Developing microservices with containers and Kubernetes Microservices are smaller and independent services within larger applications. This course provides the required skills to design, implement and deploy microservices using container technology. The students will learn how to use the Spring Boot stack to develop microservices, Docker to package them into containers, and Kubernetes to orchestrate and manage them at scale. The course covers the CI/CD process to automate the delivery of microservices. <i>Price: 1450 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 05-06-07 February 05-06-07 May 10-11-12 September 19-20-21 November
	GIT Git is a popular Open Source Distributed Version Control System. This training teaches the attendees how to use Git. As part of the training you will master the various aspects of Git architecture, how to do commits, design a Git workflow, branching and merging in Git, dealing with conflicts, merging strategies and more through hands-on projects and case studies. <i>Price: 950 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 20-21 January 14-15 April 01-02 September 17-18 November
	Jenkins CI Jenkins CI is a popular open source Continuous Integration and Continuous Delivery (CD) tool. This Jenkins training covers the fundamentals of setting up and getting going with your CI/CD project. Through hands-on exercises, you'll practice how to setup Jenkins environment and Build Jobs. You will also learn how to deploy, install and monitor several tools associated with Jenkins. <i>Price: 950 € excl. VAT / participant</i>	English in Bru. & Lux. 20-21 February 19-20 May 25-26 September 27-28 November
	Infrastructure as Code with Terraform Terraform is a popular infrastructure as code that supports multiple providers like AWS, Azure, GCP and many more. This course covers Terraform basics as well as advanced concepts like modules and state files. Participants will implement Terraform to deploy infrastructure in a consistent and repeatable manner across the AWS Cloud service. <i>Price: 1.450 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 27-28-29 January 28-29-30 April 10-11-12 September 10-11-12 December
	Ansible Ansible is a popular Software Configuration Management tool. This training course is designed to get you up and running with the Ansible essentials quickly. Through a set of guided hands-on labs, you will learn how to install and configure Ansible and how to create and run playbooks to configure systems. <i>Price: 1.450 € excl. VAT / participant</i>	EN & FR in Bru. & Lux. 17-18-19 February 19-20-21 May 29-30 September - 01 October 01-02-03 December

Most of our trainings are available in several languages, don't hesitate to contact us, we will organize extra sessions as from 4 students.

CI/CD & DEVOPS		SESSIONS
	Docker	EN & FR in Bru. & Lux. 03-04-05 February 07-08-09 May 08-09-10 September 24-25-26 November
	This course provides essential foundational knowledge for Docker and containerization. It covers all the fundamentals of Docker including containers, Dockerfiles, volumes management, networking, and more. You will learn how to build and use containers on a Docker platform through a hands-on approach with use cases. <i>Price: 1.450 € excl. VAT / participant</i>	
JAVA, SPRING		SESSIONS
	Programming in Java	EN & FR in Bru. & Lux. 10-11-12-13-14 March 23-24-25-26-27 June 29-30 September - 01-02-03 October 24-25-26-27-28 November
	This training is a comprehensive study of core Java. It teaches the object-oriented programming concepts, the Java Platform Module System (JPMS), the functional programming, and other features. Through hands-on exercises, you'll expand your knowledge of Java, while building your Java skill set. The course is completely aligned with the Oracle Java SE 17 Developer Exam 1Z0-829. <i>Price: 2.100 € excl. VAT / participant</i>	
	Java testing	EN & FR in Bru. & Lux. 24-25 February 26-27 May 04-05 September 03-04 November
	Testing is of crucial importance in developing stable applications. This course teaches you to write automated tests for your code and how to implement this in Java including JUnit 5. The course teaches the TDD practices and covers the unit tests, the integration tests, and the quality of code audits. <i>Price: 950€ excl. VAT / participant</i>	
	What's new in Java 9 to 23	EN & FR in Bru. & Lux. 22-23-24 January 28-29-30 April 22-23-24 September 24-25-26 November
	In this training, you will learn the important Java new features introduced in Java 9 to Java 23. The course is composed of a set of hands-on labs which cover the modular application development and other cool new features, including local variable type inference, text blocks, records, pattern matching, sealed classes, etc. By the end of this course, you'll know how to use the most powerful features of modern Java to write faster and more readable programs. <i>Price: 1.450 € excl. VAT / participant</i>	
	Java Design Patterns	EN & FR in Bru. & Lux. 03-04-05 March 02-03-04 June 03-04-05 September 03-04-05 December
	This training provides a deep understanding of the most common object oriented design patterns. It covers the most useful patterns from the GOF catalogue and the Enterprise Application Patterns (EAP). Through hands-on exercises and discussions, attendees will learn how to incorporate these patterns into new or existing code using modern refactoring tools. <i>Price: 1.450 € excl. VAT / participant</i>	
	Jakarta EE and Eclipse MicroProfile Development	EN & FR in Bru. & Lux. 04-05-06-07 February 12-13-14-15 May 16-17-18-19 September 01-02-03-04 December
	This Java EE 7 training course teaches you the essentials of developing applications with Java EE 7 Platform. Through hands-on exercises, you'll expand your knowledge of Web development using JavaServer Faces (JSF), Enterprise JavaBeans (EJB), Java Persistence API (JPA), JDBC, Java Transaction API (JTA), Contexts and Dependency Injection (CDI), Java Message Service (JMS). By the end of this course, you will have the knowledge and skills needed to create fully functional Java EE applications. <i>Price: 1.750 € excl. VAT / participant</i>	

JAVA, SPRING		SESSIONS
	Java Security	EN & FR in Bru. & Lux. 17-18-19 February 21-22-23 May 22-23-24 September 26-27-28 November
	This training provides the skills necessary to develop secure web applications in Java. It teaches developers common security vulnerabilities (OWASP Top Ten) in Java web applications and the best practices to write secure code. The training covers the security testing practices to put into place in order to detect flaws, fix them and strengthen the security of the application as whole. <i>Price: 1.450 € excl. VAT / participant</i>	
	Spring Core and Spring Boot	EN & FR in Bru. & Lux. 27-28-29-30 January 22-23-24-25 April 02-03-04-05 September 02-03-04-05 December
	This course teaches developers how to create enterprise applications using Spring Core and Spring Boot. Through hands-on exercises, you'll practice the main features of Spring Core including Java configuration, data access, web and REST applications, Spring Security, and Spring Boot. The course explores major features of Spring Boot, including auto-configuration, data access, Actuator, and more. <i>Price: 1.750 € excl. VAT / participant</i>	
	Spring Security	EN & FR in Bru. & Lux. 19-20-21 February 05-06-07 May 10-11-12 September 26-27-28 November
	This course teaches attendees how to secure their applications using Spring security. The course covers all of the fundamentals of Spring Security and its integration with Spring boot. Through hands-on exercises, you'll practice how to implement authentication and authorization, client integration with taglibs as well as method level permissions, and forcing connections over HTTPS. <i>Price: 1.450 € excl. VAT / participant</i>	
	Spring Cloud	EN & FR in Bru. & Lux. 26-27-28 February 26-27-28 May 24-25-26 September 24-25-26 November
	This training provides the skills necessary to develop microservices using the Spring Cloud technology stack. Microservices development raised new challenges like service discovery, service resilience, scalability and monitoring. Attendees will learn solve these challenges using the Spring Cloud technologies. The training includes many use cases and hands-on labs covering Spring Cloud and related Spring Boot and Netflix Open Source Tools. <i>Price: 1.450 € excl. VAT / participant</i>	
TESTING		SESSIONS
	IREB Foundation	English virtual class
	The "International Requirements Engineering Board" (IREB) is an international non-profit organization that focuses on the professional nature of requirements engineering, similar to ISTQB for software testing. International requirements engineering experts such as Chris Rupp and Suzanne Robertson are members of this international board, which has developed a certification program for requirements engineering (CPRE). <i>This course prepares for the "Certified Professional for Requirements Engineering - Foundation Level" exam - 275€ excl VAT / delegate</i> <i>Price: 1.725 € excl. VAT / participant</i>	Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60

CISCO		SESSIONS
	Implementing and Administering Cisco Solutions (CCNA) The Implementing and Administering Cisco Solutions (CCNA) v1.0 course gives you a broad range of fundamental knowledge for all IT careers. Through a combination of lecture and hands-on labs, you will learn how to install, operate, configure, and verify basic IPv4 and IPv6 networks. The course covers configuring network components such as switches, routers, and wireless LAN controllers; managing network devices; and identifying basic security threats. <i>Price: 3.195 € excl. VAT / participant</i>	English virtual class 20-21-22-23-24 January 17-18-19-20-21 February 10-11-12-13-14 March 07-08-09-10-11 April 19-20-21-22-23 May 02-03-04-05-06 June 21-22-23-24-25 July 22-23-24-25-26 September 01-02-03-04-05 December
	Implementing and Operating Cisco Data Center Core Technologies (DCCOR) The Implementing and Operating Cisco Data Center Core Technologies (DCCOR) v1.1 course helps you prepare for the Cisco® CCNP® Data Center and CCIE® Data Center certifications for advanced-level data center roles. In this course, you will master the skills and technologies you need to implement data center compute, LAN and SAN infrastructure. You will also learn the essentials of automation and security in data centers. You will gain hands-on experience deploying, securing, operating, and maintaining Cisco data center infrastructure. <i>Price: 3.495 € excl. VAT / participant</i>	English virtual class 20-21-22-23-24 January 24-25-26-27-28 March 05-06-07-08-09 May 23-24-25-26-27 June 01-02-03-04-05 September 20-21-22-23-24 October 01-02-03-04-05 December Visit our website or call us for updates +32 (0)2 503 40 40 +352 20 30 10 60
	Implementing Cisco Enterprise Wireless Networks (ENWLSI) The Implementing Cisco Enterprise Wireless Networks (ENWLSI) v1.1 course gives you the knowledge and skills needed to secure wireless network infrastructure and troubleshoot any related issues. You'll learn how to implement and secure a wireless network infrastructure and use Cisco Identity Service Engine (ISE), Cisco Prime Infrastructure (PI), and Cisco Connect Mobile Experience to monitor and troubleshoot network issues. <i>Price: 3.495 € excl. VAT / participant</i>	English virtual class 06-07-08-09-10 January 17-18-19-20-21 February 31 March - 01-02-03-04 April 28-29-30 April - 01-02 May 16-17-18-19-20 June 07-08-09-10-11 July 18-19-20-21-22 August 22-23-24-25-26 September 20-21-22-23-24 October 15-16-17-18-19 December
	Understanding Cisco Cybersecurity Operations Fundamentals (CBROPS) he Understanding Cybersecurity Operations Fundamentals (CBROPS) v1.0 course teaches an understanding of the network infrastructure devices, operations, and vulnerabilities of the Transmission Control Protocol/Internet Protocol (TCP/IP) protocol suite. You will learn basic information about security concepts, common network application operations and attacks, the Windows and Linux operating systems, and the types of data used to investigate security incidents. <i>Price: 3.495 € excl. CISCO	SESSIONS
 Implementing and Operating Cisco Security Core Technologies (SCOR) This course helps you prepare for the Cisco® CCNP® Security and CCIE® Security certifications and for senior-level security roles. In this course, you will master the skills and technologies you need to implement core Cisco security solutions to provide advanced threat protection against cybersecurity attacks. You will learn security for networks, cloud and content, endpoint protection, secure network access, visibility and enforcements. You will get extensive hands-on experience deploying Cisco Firepower Next-Generation Firewall and Cisco ASA Firewall; configuring access control policies, mail policies, and 802.1X Authentication; and more. You will get introductory practice on Cisco Stealthwatch Enterprise and Cisco Stealthwatch Cloud threat detection features. This course, including the self-paced material, helps prepare you to take the exam, Implementing and Operating Cisco Security Core Technologies (350-701 SCOR). Price: 2.995 € excl. CISCO

Implementing Cisco SD-WAN Solutions [New]

The Implementing Cisco SD-WAN Solutions (ENSDWI) training helps you design, deploy, configure, and manage the Cisco Software-Defined WAN (SD-WAN) solution in a large-scale network, including how to migrate from legacy WAN to Cisco SD-WAN. You will learn best practices for configuring routing protocols in the data center and the branch, and how to implement advanced control, data, and application-aware policies. This training also covers Cisco SD-WAN deployment and migration options, placement of controllers, how to deploy WAN Edge devices, multicast and quality of service (QoS), how to configure Direct Internet Access (DIA) breakout, and how to deploy a Multi-Region Cisco SD-WAN fabric. You will also learn about the various Application Quality of Experience (AppQoE) traffic optimization capabilities. Finally, the training looks at the different Cisco SD-WAN security options available.

Price: 3.495 € excl. VAT / participant

RED HAT

RH362 - Red Hat Security: Identity Management and Authentication [New]

Provide help to secure, centralized identity management services to coordinate user authentication and authorization with client systems, network services, and Windows domains. Red Hat Security: Identity Management and Authentication (RH362) provides the skills to configure and manage Identity Management (IdM), the comprehensive identity management component bundled with Red Hat Enterprise Linux. Some topics covered in this course are central management and provisioning of user accounts; design and installation of IdM server topologies; operation of the integrated DNS and TLS Certificate Authority services; management of two-factor authentication, smart card authentication, and operation as a single-sign on provider; integration and management of two-way trusts with Active Directory; and troubleshooting and disaster recovery planning. Registration of Linux clients to IdM and operation in enterprise environments that use both Linux and Microsoft Windows clients and servers is discussed. This course helps students to gain the skills with this technology most requested by customers.

Price: 3.740 € excl. VAT / participant

RED HAT

RH436 - Red Hat High Availability Clustering [New]

This course provides intensive, hands-on experience in deploying and managing shared storage and server clusters. In this course, you will learn how to provide highly available network services to a mission-critical enterprise environment through the deployment and management of shared storage and server clusters. Created for senior Linux system administrators, this course strongly emphasizes lab-based activities. You will set up a cluster of systems running the Pacemaker component of the Red Hat Enterprise Linux High-Availability Add-On, and deploy Linux-based services such as web servers and databases on that cluster. Cluster storage components from the Resilient Storage Add-On are also covered; installations and applications that require multiple cluster nodes can access the same storage simultaneously. This includes Logical Volume Manager (LVM) Shared Volume Groups, Red Hat Global File System 2 (GFS2), and Device-Mapper Multipath. This course is based on Red Hat Enterprise Linux 8.3

Price: 3.740 € excl. VAT / participant

RED HAT

DO180 - Red Hat OpenShift Administration I: Operating a Production Cluster [Most wanted]

This course prepares OpenShift cluster administrators to manage Kubernetes workloads and to collaborate with developers, DevOps engineers, system administrators, and SREs to ensure the availability of application workloads. This course focuses on managing typical end-user applications that are often accessible from a web or mobile UI and that represent most cloud-native and containerized workloads. Managing applications also includes deploying and updating their dependencies, such as databases, messaging, and authentication systems. The skills that you learn in this course apply to all versions of OpenShift, including Red Hat OpenShift on AWS (ROSA), Azure Red Hat OpenShift, and OpenShift Container Platform.

This course is based on Red Hat OpenShift 4.12

Price: 3.740 € excl. VAT / participant

DO188 - Red Hat OpenShift Development I: Introduction to Containers with Podman [New]

A developer introduction to building and managing containers with Podman for deploying applications on Red Hat OpenShift Container Platform. This course introduces students to building, running, and managing containers with Podman and Red Hat OpenShift. This course helps students build the core skills for developing containerized applications through hands-on experience. These skills can be applied using all versions of OpenShift, including Red Hat OpenShift on AWS (ROSA), Azure Red Hat OpenShift, and OpenShift Container Platform.
This course is based on Red Hat® Enterprise Linux® 8, Podman 4.2 and Red Hat OpenShift® 4.12.

DO281 - Red Hat OpenShift Administration II: Configuring a Production Cluster [Most wanted]

Configure, manage, and troubleshoot OpenShift clusters and containerized applications. This course prepares OpenShift Cluster Administrators to perform daily administration tasks on clusters that host applications provided by internal teams and external vendors, enable self-service for cluster users with different roles, and deploy applications that require special permissions such as CI/CD tooling, performance monitoring, and security scanners. This course focuses on configuring multi-tenancy and security features of OpenShift as well as managing OpenShift add-ons based on operators. The skills you learn in this course can be applied using all versions of OpenShift, including Red Hat OpenShift on AWS (ROSA), Azure Red Hat OpenShift, and OpenShift Container Platform. This course is based on OpenShift Container Platform 4.12.

DO316 - Managing Virtual Machines with Red Hat OpenShift Virtualization [New]

Create and manage virtual machines on OpenShift using the Red Hat OpenShift Virtualization operator. This course teaches the essential skills required to create and manage virtual machines (VM) on OpenShift using the Red Hat OpenShift Virtualization operator. This course does not require previous knowledge of containers and Kubernetes. This course provides: Skills required to create, access, and manage VMs on OpenShift clusters; Skills required to control usage and access of cpu, memory, storage, and networking resources from VMs using the same Kubernetes features that would also control usage and access to these resources for containers; Sample architectures to manage High Availability (HA) of VMs using standard Kubernetes features and extensions from OpenShift Virtualization; Strategies to connect VMs on OpenShift to data center services outside of their OpenShift cluster, such as storage and databases.

RED HAT

DO329 - Building Resilient Microservices with Istio and Red Hat Service Mesh

Openshift created an enterprise-ready, multi-tenant platform that made deploying and scaling microservice applications efficient and easily repeatable. But as these architectures become larger and more complex, defining how these services interact with each other becomes increasingly difficult. Red Hat OpenShift Service Mesh comprises 3 products—Istio, Jaeger, and Kiali—that facilitate service interaction management, provide service tracing, and create a visual representation of communication pathways.

DO371 Enterprise Kubernetes Storage with Red Hat OpenShift Data Foundation

Traditional storage options available to Kubernetes administrators are limited and lack flexibility and/or versatility. Red Hat OpenShift Data Foundation provides real advantages, even when it is backed by cloud storage such as AWS EBS and sophisticated on-prem legacy storage like SAN arrays. Many companies rely on third-party solutions to manage backup and disaster recovery in production. However, proper planning to implement these solutions requires knowledge of the Kubernetes CSI and OAPD APIs.

	Manage complex Red Hat Ansible automation workflows at scale and prevent single points of failure. This course is for experienced Ansible automation engineers, DevOps practitioners, and Linux system administrators seeking to deploy, control, and support centralized automation execution on a large scale. Students will use Red Hat Ansible Automation Platform 2 to scale up Ansible automation. They will deploy automation controller to centrally manage automation workflows, automation mesh to scale up and distribute execution capacity, and private automation hub to manage Ansible Content Collections and automation execution environments for use by automation developers. Large scale automation cluster design and approaches to ensure high availability of Ansible Automation Platform will also be discussed. <i>This course is based on Red Hat Ansible Automation Platform 2.2.</i> Price: 3.740 € excl. DATABASE MANAGEMENT & DATA ANALYSIS

N° 55315 - Introduction to SQL Databases

The 55315A three-day instructor-led course is provided as an introductory class for anyone getting started with databases. It will be useful to programmers and other IT professionals whose job roles are expanding into database management. Students will learn fundamental database concepts through demonstrations and hands-on labs on SQL Server, Azure SQL Server and other cloud-based SQL Server databases. This course is the equivalent of the retired legacy MOC 10985C.

Creating Power BI Paginated Reports **[New]**

Power BI Paginated Reports are an alternative way to build reports. Although they are less interactive than regular Power BI reports, they are more convenient to build reports that need to be printed, or exported to a wide variety of formats. In this course you will learn how to create new paginated reports with the Power BI Report Builder tool, using both semantic models as well as embedded data sources. Also the deployment of reports to the Power BI services is covered, as well as migration from SQL Server Reporting Services (SSRS) to Power BI Paginated Reports.

Excel 365 - Level 3 Power user

This 3 day course will train participants into becoming advanced Excel users by developing their skills regarding data handling, advanced functions, pivot tables, v-look ups, complex charts and using the integrated Power tools (Power Query, PowerPivot). The goal is to strengthen their data analysis capabilities, automate complex tasks and optimize their productivity in a professional environment.

Price: 1.200 € excl. VAT / participant

Excel Power Pivot

At the end of this course you will be able to identify which of the two tools, PivotTables and PowerPivot, is most effective for your analysis needs. In the context of PowerPivot, you will be able to consider teamwork strategies to centralise your data for analysis. Participants to this course should have a good analytical mind and master the calculation and sorting/filtering tools of Microsoft Excel.

Price: 400 € excl. VAT / participant

Excel 365 - Macro

Do you want to save time on routine tasks in Microsoft Excel? Macros are the answer. In this course the instructor explains how macros can be used to automate tasks in Excel, and how you can create simple macros yourself. You will learn when and how to record a macro step-by-step, share macros between workbooks, set up keyboard shortcuts to run macros quickly, through examples of useful macros.

Price: 400 € excl. VAT / participant

Programming with VBA Excel

On this 3-day course, participants will learn how to use Visual Basic to control Excel and to automate processes to speed up and simplify their work with Excel data. They will also learn how to create interactive procedures using message boxes and custom dialog boxes using Visual Basic control.

Price: 1200 € excl. VAT / participant

Power Query Complete

Forget VBA and discover Power Query to automate your data retrieval. This tool allows you to create complex queries without programming! At the end of this course you will be able to create data tables ready for analysis. Participants to this course should have a very good knowledge of Microsoft Excel.

Price: 800 € excl. VAT / participant

Access 365 - Level 1

Most businesses have a lot of data, from customer details and employee records to product specifications data and invoicing and scheduling systems. By learning the basics of Microsoft Access, you can get to grips with how to store that data effectively in ways that make it easy to update, query and report on it for a range of outputs. This is an intensive Access training course, introducing delegates to the concepts of creating relational databases using MS Access. Microsoft Access is a very powerful database application designed to save you time and make creating relational databases easier.

Price: 1.200 € excl. VAT / participant

Access 365 - Level 2

Many organisations have large databases in Access that have built up over the years; staff have learned enough to build a database with a good relational structure, create forms to enter data and write queries to generate some useful reports. However, when databases get big making your queries and forms effective can become more complex and it is worth investing in advanced Access training to get the most from your data and save time. And our Advanced Microsoft Access course teaches delegates how to analyse data by creating complex queries, make forms and reports more efficient, speed repetitive tasks by creating macros.

Visualize your projects with Visio WBS/RBS organization charts

This MS Visio Course, axed on project management, focuses on the creation of WBS (Work Breakdown Structure) to break down a project into manageable tasks, which are easier to plan and execute, as well as RBS (Resource Breakdown Structure) to visualize the necessary resources in order to efficiently assign responsibilities. Together, these tools offer a comprehensive overview and details of a project, to facilitate an optimal and visual project management.

SOFT SKILLS	SESSIONS
 Digital transition, driving change This course will enable you to better support the transformation of an organisation towards the digital enterprise. You will discover the new digital tools that accelerate change and move the lines between IT, HR and Business. It will also show you how controlling the human impact of these changes is essential to the success of your projects. <i>Price: 950 € excl. VAT / participant</i>	Dutch in Brussels 10-11 February 12-13 May 18-19 September 24-25 November French in Bru. & Lux. 10-11 March 12-13 June 9-10 October 8-9 December
 Manager: supporting your team in a crisis situation The aim of this training is to enable you to acquire the tools and the appropriate behaviour to manage each phase of a crisis and uncertainty situation effectively and humanely. You will also learn how to prevent and anticipate crisis situations by assessing threats and risks. <i>Price: 950 € excl. VAT / participant</i>	Dutch in Brussels 3-4 March 5-6 June 6-7 October 1-2 December French in Bru. & Lux. 30-31 January 14-15 April 4-5 September 3-4 November
 Change management Be able to carry out full problem analyses dealing with change, and provide accompaniment to your co-workers. Objectives: - Identify your own inhibitions towards change and develop the strategies to cope with them; - Discover your personal keys to success, your own strengths and talents; - Define the different actors in the change process and take control over them. <i>Price: 550 € excl. VAT / participant</i>	Dutch in Brussels 14 February 25 April French in Bru. & Lux. 16 January 20 March
 Time and priority management Learn how to efficiently manage your time and your priorities. Objectives: - Become aware of your own responsibility in terms of time management to improve your personal efficiency; - Focus on the high-yield activities and (re)define priorities; - Acquire time management techniques, for yourself and for your co-workers <i>Price: 550 € excl. VAT / participant</i>	Dutch in Brussels 21 February French in Bru. & Lux. 22 January 27 March
 Team management Lead your team to the highest performances and develop the potential and the motivation of your co-workers. Objectives: - Know and recognize your managerial skills in order to improve them. - Learn how to adopt managerial communication adapted to situations and people. - Adopt and apply the most efficient managerial style according to the functions and experience of the team. <i>Price: 950 € excl. VAT / participant</i>	Dutch in Brussels 03-04 February 03-04 April French in Bru. & Lux. 30-31 January

Our Soft Skills trainings are developed with our partner, Teampower

SOFT SKILLS	SESSIONS
 Stress management and self-control Keep your stress under control, as well as your ressources, in situations where there are expectations and obligations. Objectives: - Understand the stress mechanisms and their impact on the balance between work and private life. - Turn stress into power and use it in your way of working, your efficiency, your assertiveness. - Maintain the balance: work/life and burden/strength. <i>Price: 550 € excl. VAT / participant</i>	Dutch in Brussels 6 January 21 March French in Bru. & Lux. 19 February
 Team cohesion Team cohesion is the quality of the bond that brings people together, that unites. This is what allows you to surpass yourself for the benefit of the community. Each employee then feels competent, important and in their place within the team. Objectives: - Learn to work better together and to create real synergy in order to easily achieve common objectives; - strengthen team cohesion and create a positive team spirit <i>Price: 550 € excl. VAT / participant</i>	Dutch in Brussels 19 February 10 April French in Bru. & Lux. 28 January 10 March
 Digital detox for managers Reduce dependence on technology, both for you and your teams, by creating healthy digital habits, to reduce screen time and improve focus & work-life balance. Objectives: - Awareness and personal assessment. - Self-assessment of digital habits. - Understand how technology impacts productivity and well-being; <i>Price: 550 € excl. VAT / participant</i>	Dutch in Brussels 7 February 23 April French in Bru. & Lux. 24 January 21 March
 Conflict management and how to stop it on time Conflict is common but not necessarily harmful: it can be prevented, managed or transformed into tracks for improvement.Understand that conflicts can also have positive effects, and learn to master techniques to anticipate conflicts, to manage the interpersonal issues, to solve conflicts in a team. Objectives: - Definition, types of conflicts, the causes and the evolution of conflicts. - Acquire methods to manage and solve conflicts in a constructive way. - Evaluate the impact of one's attitude on the handling of the conflict. - No solution? Separate conflict and environment. <i>Price: 950 € excl. VAT / participant</i>	Dutch in Brussels 23 & 30 January 14 & 21 March French in Bru. & Lux. 01 & 17 February 11 & 18 April
 Motivate your collaborators Motivation is not something acquired once and for all, it needs to be maintained. Look at your own example. You are probably not motivated in the same way every day, you go through phases, even slight ones, of doubt, even discouragement. Objectives: - Control the impact of your own (de)motivation on that of your collaborators. - Identify the sources of your colleagues' motivation (avoid projections). <i>Price: 550 € excl. VAT / participant</i>	Dutch in Brussels 07 February 22 April French in Bru. & Lux. 10 January 31 March

SOFT SKILLS

SESSIONS

Feedback, a management tool

"How can I give continuous feedback in an open and constructive manner? How can I prepare myself for a feedback conversation? Which tools can I use? To give and take feedback is essential for efficient communication and good functioning within an organization. This is why feedback shouldn't only be limited to key moments such as counselling and performance reviews or whilst encountering problems or dealing with crisis situations.

Objectives:

- Master the two techniques: positive feedback, constructive criticism feedback.
- Recognize the communication needs of your team.
- Master a method for giving feedback without demotivating.

Intergenerational management

By putting on so-called "generation glasses", we are able to better understand all generations and give them an optimal place in the organization. Intergenerational management provides the answer to the question "How can we improve our existing management by making it "generationproof".

Objectives:

- Understanding the different generations and their phases of life;
- The strengths and pitfalls of each generation;
- The backgrounds of the different generations and the impact this has on their attitude, way of working, motivation and employability
